Sociocultural Anthropology -

Barbara Miller 2019-12-12

This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art,

urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an essential resource for scholars and students of the subject.

Praise for Stupid Fast "A rare

Stupid Fast is Stupid Good!" -
Peter Bognanni, author of The
House of Tomorrow I AM NOT
STUPID FUNNY. I AM STUPID
FAST. My name is Felton
Reinstein, which is not a fast
name. But last November, my
voice finally dropped and I
grew all this hair and then I got
stupid fast. Fast like a donkey.

Zing! Now they want me, the
guy they used to call Squirrel
Nut, to try out for the football
team. With the jocks. But will
that fix my mom? Make my
brother stop dressing like a
pirate? Most important, will it
get me girls-especially Aleah?
So I train. And I run. And I
sneak off to Aleah's house in
the night. But deep down I
know I can't run forever. And I
wonder what will happen when
I finally have to stop.

The Biopolitics of Gender - Jemima Repo 2016
This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender

apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Molecular Determinants of Head and Neck Cancer -

Barbara Burtness 2014-04-08
Squamous cell cancers of the
head and neck (SCCHN), also

known as head and neck
cancers (HNC) encompass
malignancies of the oral cavity,
larynx, nasopharynx and
pharynx, and are diagnosed in
over 500,000 patients
worldwide each year,
accounting for 5% of all
malignancies. In the past
several years, there have been
significant developments in
understanding of HNC. It is
now recognized that although
alcohol and tobacco use has
represented the likely
predominant cause of SCCHN,
the incidence of a second class
of SCCHN related to oncogenic
human papillomavirus (HPV)
infection is increasing, with a
four-fold increase in the past 2
decades, and now thought to
represent up to 30% of cases.
The first effective target for
SCCHN, the EGFR-targeting
antibody cetuximab, was
approved as recently as in
2006; since then, a growing
body of research has identified
additional signaling pathways
as important in disease
pathogenesis, and in resistance
to treatment. Proteins such as
c-Met, Src, and HER2 are

emerging as new therapeutic targets, with a considerable ferment in the clinical trial community. As a capstone of research progress, 2011 marked the first reports of high throughput sequencing of SCCHN tumors, with these efforts identifying unexpected players such as Notch as frequent subject of mutation, spawning new hypotheses for future research. This book will be of interest to researchers who are interested in better understanding the biology of head and neck cancers, with the goals of better designing therapies, identifying risk factors, or investigating the molecular basis of the disease.
