## **Walking with Peety** - Eric O'Grey

2017-10-10

This is more than a tale of mutual rescue. This is an epic story of friendship and

strength. Eric was 150 pounds overweight, depressed, and sick. After a lifetime of failed diet attempts, and the onset of type 2 diabetes due to his weight, Eric went to a new doctor, who surprisingly prescribed a shelter dog. And that's when Eric met Peety: an overweight, middle-aged, and forgotten dog who, like Eric,

had seen better days. The two adopted each other and began an incredible journey together, forming a bond of unconditional love that forever changed their lives. Over the next year, just by going on walks, playing together, and eating plant-based foods, Eric lost 150 pounds, and Peety lost 25. As a result, Eric reversed his diabetes, got off all medication, and became happy and healthy for the first time in his life -- eventually reconnecting with and marrying his high school sweetheart. WALKING WITH PEETY is for anyone ready to make a change in his or her life, and for everyone who knows the joy, love, and hope that dogs can bring.

Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration and autoimmune disorders—also beset canines. As a result, our beloved companions struggle with preventable health problems throughout much of their lives. Because dogs can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices on their behalf. Rodney Habib and Karen Becker, DVM, travelled the world collecting wisdom from top geneticists, microbiologists and longevity researchers. They also interviewed people whose dogs have lived into their twenties and even thirties. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice and inspiring stories about dogs and the

people who love them. The Forever Dog prescriptive plan can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including details commercial manufacturers don't want us to know—and offer recipes, tips and easy solutions for ensuring our dogs obtain the nutrients they need. They also explore how external factors that we often overlook can greatly affect a dog's overall health and well-being—including the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." This definitive dog-care guide empowers us with the knowledge we need to make wise choices and keep our dogs healthy and happy for years to come.

or caught... and it wasn't cooked or "enriched" either! It was high in protein, with balanced fats, and usually included a few fruits, vegetables and grasses. Steve Brown, an expert on canine nutrition, shows how you can bring the benefits of the canine ancestral diet to your dog by feeding him differently as little as just one day a week. And no, you won't need to lead a pack of dogs on a hunting expedition! Just follow Steve's well-researched and easy to follow ABCs to make improvements to whatever your dog currently eats. BONUS! Raw food or home prepared feeders will learn how to balance nutrients more precisely, especially fats, for optimum health. A dog diet to get wild about! • Learn about the latest research on the importance of protein and healthy fats in your dog's diet. • Find out why commercial foods can't include these fragile-but-crucial nutrients, and how you can make sure your dog gets them. • Just one day a week, or more frequently

if you choose, follow the simple recipes that balance the nutrition in the commercial food you are feeding—wet or dry!

## **90 Healthy & Easy Dog Food Recipes** - Hellen Davis

2021-07-06

Do you want to know what is in your dog's food? Do you treat your pampered pooch like a fur baby rather than a family pet? Do you want what's best for your pup? 90 Healthy & Easy Dog Food Recipes contains many healthy and delicious dog food recipes that your dog will love! You can make your dog's food so that you know just what they are eating. Commercially produced dog food can contain ingredients that are not always best for your dog. Dogs need a good mix of nutrients. Most commercial dog food doesn't contain the right balance of nutritional needs for every dog. If your dog needs a special diet, you should really prepare your dog's food yourself. A homemade dog food diet can have many benefits when it is

properly nutritionally balanced and adjusted to the specific needs of the pet. However, the only way to achieve this is if the pet owner works with their veterinarian or a certified canine nutritionist to make sure everything is done appropriately. All nutrients need to be balanced in a diet so they can be properly absorbed by the body and used appropriately by each body system. If a diet doesn't contain enough energy, then the gastrointestinal tract may not be able to consume enough of the diet to get the appropriate nutrients. The only way to determine if a diet contains enough energy is to do a feeding study to make sure the ingredients are enough to maintain a healthy daily lifestyle. In addition to providing really great dog food recipes, I have also researched other diet-related facts for you to consider. You will learn all about caring for your dog's nutritional health.
