**LIFE Guide to Digital Photography** - Joe McNally 2010-10-19

Photography has been the business and the passion of LIFE since the original weekly magazine's inception in 1936, and it continues to be the business and passion of LIFE Books and LIFE.com in the new millennium. But photography has surely changed during these many decades. The rigs and gear of old have given way-first slowly, then all at once-to sleek miracle machines that process pixels and have made the darkroom obsolete. The casual photog puts eye to lens, sets everything on auto and captures a photograph that is . . . perfectly fine. One of LIFE's master shooters-in fact, the final

in the long line of distinguished LIFE staff photographers-was Joe McNally, and he has always believed that with a little preparation and care, with a dash of enthusiasm and daring added to the equation, anyone can make a better photo-anyone can turn a "keeper" into a treasure. This was true in days of yore, and it's true in the digital age. Your marvelous new camera, fresh from its box, can indeed perform splendid feats. Joe explains in this book how to take best advantage of what it was designed to do, and also when it is wise to outthink your camera or push your camera-to go for the gold, to create that indelible family memory that you will have blown up as large as the technology will allow, and that will hang on the wall forevermore. As the storied LIFE photographer and photo editor John Loengard points out in his eloquent foreword to this volume, there are cameras and there are cameras, and they've always been able to do tricks. And then there is photography. Other guides may give you the

one, two, three of producing a reasonably well exposed shot, but Joe McNally and the editors of LIFE can give you that, and then can show you how to make a picture. In a detailed, friendly, conversational, anecdotal, sometimes rollicking way, that's what they do in these pages. Prepare to click.

**HUMANS** - Henry Carroll 2021-10-26

A startling and original look at what it means to be human in a rapidly changing world, from bestselling author and art writer Henry Carroll, with images by a diverse and innovative group of

contemporary photographers See through the eyes of a new generation of photographers responding to the rapidly unfolding issues shaping our lives. In this series of small, insightful, and beautifully presented books, Henry Carroll, the bestselling photography writer of the last decade, considers the ideas behind images to present personal perspectives on climate change, race, sexuality, gender, faith, inequality, beauty, power, and our contradictory relationship to animals and the natural world. The first book in the series, HUMANS, reveals how contemporary photographers use visual language to pose honest and confronting questions about our bodies, the purpose of faith in a fact-based world, systemic social structures that limit and allow freedom, and the opposing forces of unconditional love and abject cruelty. In this diverse collection of arresting images and insightful text, Carroll regards the photographers as modern-day philosophers, original thinkers who fuse technique, concept,

and imagination in order to provoke meaningful visual reflections on what matters most. For both creators and consumers of images, HUMANS is an immersive and supremely relevant book offering a treasure trove of ideas and visual inspiration designed to cultivate a deeper, more personal understanding of who we are, why we are, and what we think.

Understanding Color in Photography - Bryan Peterson 2017-08-29

Veteran photographer and instructor Bryan Peterson is best known for his arresting imagery using bold, graphic color and composition. Here he explores his signature use of color in photography for the first time, showing readers his process for creating striking images that pop off the page. He addresses how to shoot in any type of light, and looks at color families and how they can work together to make compelling images in commercial and art photography. He also helps readers understand exposure, flash, and other stumbling blocks that beginning and

experienced photographers encounter when capturing images, showing how to get the most out of any composition. With its down-to-earth voice and casual teaching style, *Understanding Color in Photography* is a workshop in a book, helping any photographer take their images to the next level.

**Amusing Ourselves to Death** - Neil Postman  
2005-12-27

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by

more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, *The Washington Post Book World*  
*The Trail of Blood* - J.M. Carroll 2019-10-24  
Dr. JM Carroll's "The Trail of Blood" is a great historical premise concerning the beginnings of the church from "Christ it's founder, till the current day". Written in the early 20th century, Dr. Carroll details the history and plight of TRUE bible believers throughout time. Still as relevant today as it was almost 100 years ago, this timeless classic is a must-have part of any

Christian's personal reading collection.

**Semantics** - James R. Hurford 2007-04-19

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for

introductory courses in linguistics as well as intermediate students.

**The Decisive Moment** - Henri Cartier-Bresson 2014

One of the most famous books in the history of photography, this volume assembles Cartier-Bresson's best work from his early years.

**On Photography** - Susan Sontag 2001-06  
Winner of the National Book Critics' Circle Award for Criticism. One of the most highly regarded books of its kind, "On Photography" first appeared in 1977 and is described by its author as "a progress of essays about the meaning and career of photographs." It begins with the famous "In Plato's Cave" essay, then offers five other prose meditations on this topic, and concludes with a fascinating and far-reaching "Brief Anthology of Quotations."

**Man and His Symbols** - Carl G. Jung 1968-08-15  
The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their

effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung’s revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life’s work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general

reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

**Prominent Families of New York** - Lyman Horace Weeks 1898

*Ignition!* - John Drury Clark 2018-05-23  
This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of

nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

*How to Read a Person Like a Book* - Gerard I. Nierenberg 1994

This unique program teaches listeners how to "decode" and reply to non-verbal signals from friends and business associates when those signals are often vague and thus frequently

ignored.

**Good and Cheap** - Leanne Brown 2015-07-14  
A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master’s candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government’s Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like

spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

**Photographers on Photography** - Nathan Lyons 1966

**The Books in My Life** - Henry Miller 1969  
In this unique work, Henry Miller gives an

utterly candid and self-revealing account of the reading he did during his formative years.

*The Night I Heard Everything* - Mary Carroll-Hackett 2015

This second full collection of prose poems from Mary Carroll-Hackett traces through a life spent in liminal places, particularly that often shadowy and always sacred realm between life and death, touching on both the isolation and the grace, even the bliss, such an existence can bring.

Poems made of love and heartbreaking loss, the collection works toward healing, a reconciliation of soul and self, of body and spirit, of the peace to be found even while walking with a foot in both worlds.

*The Help* - Kathryn Stockett 2011

Limited and persecuted by racial divides in 1962 Jackson, Mississippi, three women, including an African-American maid, her sassy and chronically unemployed friend and a recently graduated white woman, team up for a clandestine project against a backdrop of the

budding civil rights era. Includes reading-group guide. Reissue. A #1 best-selling novel.

**Dictionary of Photography and Digital Imaging** - Tom Ang 2002

Through the Language Glass - Guy Deutscher  
2010-08-31

A masterpiece of linguistics scholarship, at once erudite and entertaining, confronts the thorny question of how—and whether—culture shapes language and language, culture. Linguistics has long shied away from claiming any link between a language and the culture of its speakers: too much simplistic (even bigoted) chatter about the romance of Italian and the goose-stepping orderliness of German has made serious thinkers wary of the entire subject. But now, acclaimed linguist Guy Deutscher has dared to reopen the

issue. Can culture influence language—and vice versa? Can different languages lead their speakers to different thoughts? Could our experience of the world depend on whether our language has a word for "blue"? Challenging the consensus that the fundamentals of language are hard-wired in our genes and thus universal, Deutscher argues that the answer to all these questions is—yes. In thrilling fashion, he takes us from Homer to Darwin, from Yale to the Amazon, from how to name the rainbow to why Russian water—a "she"—becomes a "he" once you dip a tea bag into her, demonstrating that language does in fact reflect culture in ways that are anything but trivial. Audacious, delightful, and field-changing, Through the Language Glass is a classic of intellectual discovery.

**Extraordinary Everyday Photography** - Brenda Tharp 2012-08-21

Through accessible discussions and exercises, readers learn to use composition, available light, color, and point of view to create stunning

photographs in any environment. Photographers are born travelers. They'll go any distance to capture the right light, beautiful landscapes, wildlife, and people. But exotic locales aren't necessary for interesting photographs.

Wonderful images are hiding almost everywhere; you just need to know how to find them.

Extraordinary Everyday Photography will help you search beyond the surface to find the unexpected wherever you are, be it a downtown street, a local park, or your own front lawn.

Authors Brenda Tharp and Jed Manwaring encourage amateur photographers to slow down, open their eyes, and respond to what they see to create compelling images that aren't

overworked. Inspiring photo examples from the authors, taken with DSLRs, compact digital cameras, and even iPhones, show that it is the photographer's eye and creative vision--not the gear--that make a great image.

To the Lighthouse - Virginia Woolf 2019-05-04

To the Lighthouse (5 May 1927) is a novel by

Virginia Woolf. A landmark novel of high modernism, the text, centering on the Ramsay family and their visits to the Isle of Skye in Scotland between 1910 and 1920, skillfully manipulates temporality and psychological exploration. To the Lighthouse follows and extends the tradition of modernist novelists like Marcel Proust and James Joyce, where the plot is secondary to philosophical introspection, and the prose can be...

**ANIMALS** - Henry Carroll 2021-10-26

An innovative and insightful look at our relationship with animals in the age of the Anthropocene from bestselling author Henry Carroll with original images from an innovative array of contemporary photographers See through the eyes of a new generation of photographers responding to the rapidly unfolding issues shaping our lives. In this series of small, revealing, and beautifully presented books, Henry Carroll, the bestselling photography writer of the last decade, considers the ideas behind images to present personal perspectives on climate change, race, sexuality, gender, faith, inequality, beauty, power, and the natural world. In this second book of the series, ANIMALS, Carroll deep-dives into an ecosystem of contemporary images to consider how we relate to animals in the Anthropocene. His accessible analysis of emotive imagery suggests

that our appreciation for some animals and disregard, or repulsion, for others is shaped by our own physicality as much as theirs. He shows how the conventions of natural history offer a very politicized understanding of fauna and how the role of animals as spiritual, cultural, and personal symbols can be an equally valid means of classification. Carroll reflects on the psychological power struggles infusing our daily interactions with animals and unpacks the photographers' visual insights relating to our treatment of animals, whether it's the way we pamper them as pets or consume them to excess. In this diverse collection of arresting images and engaging text, Carroll regards the photographers as modern-day philosophers, original thinkers who show us how to fuse technique, concept, and imagination in order to pose intriguing questions about the animal kingdom and human nature. For both the creators and consumers of images, this timely book contains a treasure trove of meaningful

visual reflections that will prompt you to rethink your relationship with animals both domestic and wild.

**Read This If You Want to Take Great Photographs** - Henry Carroll 2014-03-25

Photography is now more popular than ever thanks to the rapid development of digital cameras. Read This If You Want to Take Great Photographs is for this new wave of DSLR dabblers and users of compact system, and bridge cameras. It contains no graphs, no techie diagrams and no camera club jargon. Instead, it inspires readers through iconic images and

playful copy packed with hands-on tips. Split into five sections, the book covers composition, exposure, light, lenses, and seeing. Images taken by master photographers - including Henri Cartier- Bresson, Sebastião Salgado, Fay Godwin, and Martin Parr - serve to illustrate points and encourage readers to try out new ideas. Today's aspiring photographers want immediacy and see photography as an affordable way of expressing themselves quickly and creatively. This book answers that need, teaching readers how to take photographs using professional techniques.
