Financial & Managerial Accounting - Carl S. Warren 2016-09-14

Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business and a prosperous society. Warren/Reeve/Duchac's FINANCIAL AND MANAGERIAL ACCOUNTING, 14E clearly demonstrates how accounting is much more than simply data and black and white rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments, and reorganized managerial accounting chapters Important Notice: Media content referenced within the product description or the product text

COLLECTIVE INSTITUTIONS IN INDUSTRIALIZED NATIONS:

Economic Lessons for sub-Saharan Africa - Samuel Enajero, Ph.D.

2015-12-08

Fundamental institutions are core values that originate from beliefs. Beliefs reflect on behaviors and repeated behaviors become habits. Shared habits are peoples' values, which when ingrained become norms and customs. Societies that believed in human interdependency formed collective institutions. These institutions are compatible with modern economic prosperity. Thus, Contrary to conventional economic teaching, which implies that behaviors, including preferences are biologically determined, all socially relevant behaviors, including economic behaviors are acquired, learned and routinized through habits (institutions) in which individuals find themselves. Again, contrary to popular beliefs that economics is about "pursuit of self-interest" as stipulated by Adam Smith (1776), the "pursuit of self-interest" does not translate to selfishness. For example, an entrepreneur relies on public capitals and skilled labors to succeed; a producer relies on adequate consumption to produce at capacity; a firm's profit is enhanced with higher consumer income, etc. Therefore, capitalism is a function of collective institutions. Collectivism is a solution to group interdependency. People sharing the same space are interdependent and are faced with interdependency costs. Interdependency cost equals external cost plus decision making cost. Failures to eliminate or minimize external costs (externalities) through collectivization of activities result to resource misallocation. The problem of sub-Saharan Africa. Moreover, modern development theories are constructed around macroeconomic variables. Money, banking, interest rate, savings, trade liberalization, financial assets, deficit and debt management are modern macroeconomic development tools. These are based on aggregation of data and variables. Thus, collectivism is more

pronounced in macroeconomic policies. Yet, many emerging nations of sub-Saharan Africa, do not find it mandatory to build all-inclusive economies by mobilizing resources en masse.

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper

information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Principles of Corporate Finance - Richard A. Brealey 2019-01-07

Brealey, Principles of Corporate Finance 13e describes the theory and practice of corporate finance. We hardly need to explain why financial managers must master the practical aspects of their job, but we should spell out why down-to-earth managers need to bother with theory.

Throughout this edition, the authors demonstrate how managers use financial theory to solve practical problems. They also explore what financial managers should do to increase company value. Some of the biggest changes in this edition were prompted by the tax changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.
