Founding Myths - Ray Raphael 2014-07-04

First published ten years ago, award-winning historian Ray Raphael's *Founding Myths* has since established itself as a landmark of historical myth-busting. With the author's trademark wit and flair, *Founding Myths* exposes the errors and inventions in America's most cherished tales, from Paul Revere's famous ride to Patrick Henry's "Liberty or Death" speech. For the seventy thousand readers who have been captivated by Raphael's eye-opening accounts, history has never been the same. In this revised tenth-anniversary edition, Raphael revisits the original myths and explores their further evolution over the past decade, uncovering new stories and peeling back additional layers of misinformation. This new edition also examines the highly politicized debates over America's past, as well as how school textbooks and popular histories often reinforce rather than correct historical mistakes. A book that "explores the truth behind the stories of the making of our nation" (National Public Radio), this revised edition of *Founding Myths* will be a welcome resource for anyone seeking to separate historical fact from fiction.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science

community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Identity, Trauma, Sensitive and Controversial Issues in the

Teaching of History - Hilary Cooper 2015-10-13

History Education is a politically contested subject. It can be used to both promote xenophobia and to develop critical thinking, multiple perspectives, and tolerance. Accordingly, this book critically examines complex issues and constructivist approaches that make history relevant to students' understanding of the modern world. As such, it has global appeal especially in North and South America, Canada, Europe and Asia. The book's authors address the major challenges that History Education faces in an era of globalisation, digital revolution and international terror, nationalism and sectarian and religious conflict and warfare. Central to this volume are controversial issues, trauma, and questions of personal and national identity from a wide range of international settings and perspectives. The research in this book was undertaken by leading history educators from every continent. Their interdisciplinary research represents an important contribution to the teaching of social sciences, social psychology, civic education programmes, history and history education in schools, colleges and universities. The book offers new approaches to history educators at all levels. In addition, the chapters offer potential as required reading for students to both develop an international perspective and to compare and contrast their own situations with those that the book covers. Section I considers issues related to identity; how can history education promote social coherence in multicultural societies, in societies divided by sectarianism, or countries adapting to regime changes, whether Communist or Fascist, including, for example, South Africa, previously Communist countries of Eastern Europe, and previous dictatorships in South America and Western Europe. It discusses such questions as: How important is it that students learn the content of history through the processes of historical enquiry? What should that content be and who should decide it, educators or politicians? What is the role of textbooks and who should write and select them? Should history be taught as a discrete discipline or as part of a citizenship or social sciences curriculum? Sections II and III explore ways in which memory of sensitive issues related to the past, to war, or to massacres may be addressed. Are there new methodologies

or approaches which make this possible? How can students understand situations involving intolerance and injustice?
