

Dr Mohamed Awad Ahmed Adam Mbbs Md Gfmer

This is likewise one of the factors by obtaining the soft documents of this **Dr Mohamed Awad Ahmed Adam Mbbs Md Gfmer** by online. You might not require more times to spend to go to the ebook opening as well as search for them. In some cases, you likewise complete not discover the statement Dr Mohamed Awad Ahmed Adam Mbbs Md Gfmer that you are looking for. It will extremely squander the time.

However below, gone you visit this web page, it will be therefore certainly simple to get as capably as download lead Dr Mohamed Awad Ahmed Adam Mbbs Md Gfmer

It will not undertake many period as we accustom before. You can realize it while function something else at house and even in your workplace. fittingly easy! So, are you question? Just exercise just what we provide under as competently as evaluation **Dr Mohamed Awad Ahmed Adam Mbbs Md Gfmer** what you considering to read!

Hereditary Hemorrhagic Telangiectasia - Hans-Jurgen Mager
2021-05-04

Hereditary hemorrhagic telangiectasia (HHT) is an inherited disease that affects the blood vessels, and is characterized by direct connections between arteries and veins with no intervening capillaries. These abnormal vessels may appear in the skin as tiny red dilated blood vessels in the mouth, lips, fingers and toes. The presence of these vascular lesions in the mucosa can lead to spontaneous and recurrent nose bleeding, typically beginning in mid-childhood, and this is the most common clinical manifestation of HHT, occurring in over 90% of patients. Gastrointestinal bleeding, derived from mucocutaneous vascular lesions, affects approximately 25% of patients, almost always presenting after the age of 50. Chronic nasal and gastrointestinal bleeding can cause iron-deficiency anemia, and current therapeutic strategies are trying to minimize iron and blood transfusions. HHT patients also present large vascular lesions, known as arteriovenous malformations, that occur in internal organs like lungs, liver, and brain, and may result in life-threatening complications often related to the shunting of blood. This book not only highlights the current knowledge regarding diagnosis and treatment of HHT, but also the newest insights in the molecular basis of HHT, the understanding of which is essential for the development of new medicines or therapeutic strategies.

Sudan: The Rise of Closed Districts' Natives - Omer Shurkian
2021-02-26

Sudan has been pitted by the most brutal civil wars in Africa, which began just prior to its independence in 1956. The root causes of these wars are too many, notably the forcible Islamisation and Arabisation of diverse peoples by all successive governments. These two contentious policies are always a cloak for racism against the indigenous population of the country, have adversely contributed to schism between secularists and Islamists, fuelled identity crisis and caused unimaginable human rights violations. The book discusses the early signs of conflict in the former Closed Districts and the harbinger of unforeseen crisis, which was predicted by a sagacious politician amid the stubbornness of Northern elites and the leaders of sectarian parties. In spite of the looming crises, these pre- and post-independence politicians were jockeying for power that was left over by the departing colonialists. This work also focuses on the conflict in each region of what was once classified as a Closed District and the brutal crackdown by the Khartoum regimes against defenceless civilians. The ferocity of civil war in every war-torn area caused the loss of lives and property, created thousands of internally displaced persons and drove thousands more into neighbouring countries as refugees eking out a frugal living in refugee camps. The thesis also discusses peace initiatives, the stumbling blocks, their outcomes and failures to materialise into a concrete accord; it proposes how the crisis of governance in Sudan can be settled politically and peacefully once and for all.

Diagnosis of Acute Abdominal Pain - F. T. De Dombal 1991

This revised and expanded edition deals with the diagnosis of acute abdominal pain. Topics covered include perforated peptic ulcer and acute pancreatitis, a revision of the physical examination, acute abdominal pain in children, and urinary tract problems.

Nutrition and Cancer - Vera C. Mazurak 2018-06-22

This book is a printed edition of the Special Issue "Nutrition and Cancer" that was published in *Nutrients*

Phoenix processional - Dan Locklair 1998-06-01

(Organ). Excerpted from *Phoenix Fanfare and Processional*, this solo organ version features flexible duration. Played with one repeat observed: duration ca. 6 minutes.

Emergency Situations in Sudan and Liberia - United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on African Affairs 1991

Major Companies of the Arab World 1993/94 - Giselle C Bricault
2012-12-06

This book represents the seventeenth edition of the leading IMPORTANT reference work MAJOR COMPANIES OF THE ARAB WORLD. All company entries have been entered in MAJOR COMPANIES OF THE ARAB WORLD absolutely free of This volume has been completely updated compared to last charge, thus ensuring a totally objective approach to the year's edition. Many new companies have also been included information given. this year. Gynecologic and Obstetric Surgery - Arri Coomarasamy 2016-01-27

Gynecologic and obstetric surgery is a craft that requires sound knowledge and skills. The specifics of each individual case must be understood to enable the best surgical management approach and to minimize complications. This resource book offers insightful management options to many of the challenges a gynecologic or obstetric surgeon may face before, during and after an operation. Divided into two sections, the book first covers general preoperative, intraoperative and postoperative challenges and, second, specific surgical procedures. It provides advice on both general gynecologic and obstetric operations, as well as subspecialist areas such as reproductive surgery, urogynecology and gynecologic oncology. The chapters are concise, beginning with illustrative case histories followed by background, management options, and any preventative approaches. Designed to guide the surgeon to safe practice throughout all stages, they offer practical and step-by-step help.

Textbook of Addiction Treatment - Nady el-Guebaly 2020-11-03

Addiction is increasingly being recognized as a major global public health issue, and an ever-growing number of medical specialties, psychological and social science training programs, and professional associations are including addiction as part of their training and continuing education curricula. The first edition of this book presented an overview of the spectrum of addiction-related problems across different cultures around the globe. Sharing the experience and wisdom of more than 260 leading experts in the field, and promoted by the International Society of Addiction Medicine, it compared and contrasted clinical practices in the field of addiction medicine on the basis of neurobiological similarities as well as epidemiological and socio-cultural differences. Building on the success of this inaugural edition, and taking into account the formal and informal comments received as well as an assessment of current need, this textbook presents general updated information while retaining the most requested sections of the first edition as demonstrated by the number of chapter downloads. It also

provides a basic text for those preparing for the ISAM annual certification exam. Written by some 220 international experts, it is a valuable reference resource for anyone interested in medicine, psychology, nursing, and social science.

The Myth of Martyrdom - Adam Lankford 2013

Adam Lankford looks at the motivation of suicide bombers and other rampage killers.

Africa Confidential - 2000

Robot-Assisted Radical Prostatectomy - John W. Davis 2016-09-07

This book addresses knowledge gaps in RARP in 3 key sections: 1) Step-by-step approach including multiple technique options and innovations, 2) Patient selection, safety, outcomes, and 3) Preparing the patient for surgery. The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first. Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place—medical evaluations, imaging, clinical trials, patient education, etc. This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence. The learning curve is addressed and the authors clarify how this text is useful for learners. The caveat is that they should be careful in patient selection and stick with what their mentors are showing them. With experience, they can then branch out into the many techniques presented here.

Robot-Assisted Radical Prostatectomy: Beyond the Learning Curve will also have cross-over appeal for surgical assistants, physician assistants, nurses, and anyone else involved in the surgical care of prostate cancer.

Yearbook of International Organizations - 1967

Edition for 1983/84- published in 3 vols.: vol. 1, Organization descriptions and index; vol. 2, International organization participation; vol. 3, Global action networks; edition for 2012/2013- published in 5 vols: vol. 4, International organization bibliography and resources; vol. 4, Statistics, visualizations & patterns.

Skull Base Cancer Imaging - Eugene Yu 2017-12-22

Skull base anatomy is extremely complex, with vital neurovascular structures passing through multiple channels and foramina. Brain tumors such as pituitary tumors, acoustic neuromas, and meningiomas are challenging to treat due to their close proximity to cranial nerves and blood vessels in the brain, neck, and spinal cord. Medical imaging is an essential tool for identifying lesions and critical adjacent structures.

Detecting and precisely mapping out the extent of disease is imperative for appropriate and optimal treatment planning and ultimately patient outcome. Eugene Yu and Reza Forghani have produced an exceptional, imaging-focused guide on various neoplastic diseases affecting the skull base, with contributions from a Who's Who of prominent radiologists, head and neck surgeons, neurosurgeons, and radiation oncologists. The content is presented in a clear and concise fashion with chapters organized anatomically. From the Anterior Cranial Fossa, Nasal Cavity, and Paranasal Sinuses - to the Petroclival and Lateral Skull Base, an overview and detailed analysis is provided for each region. Key Highlights Fundamentals of skull base imaging, including recent developments in diagnostic modalities More than 400 radiographs, color anatomical drawings, and color intraoperative photos elucidate the imaging appearances of a wide spectrum of disease affecting the skull base, as well as important anatomic variants and pathways of disease spread Clinically oriented imaging approach focuses on diagnostic and prognostic features important in the evaluation of skull base abnormalities Atlas of skull base CT and MRI anatomy provides an easy to access, quick reference for identifying important anatomic landmarks Insights on the pathways of tumor growth and the role of clinical imaging in the management of skull base cancers Critical and contrasting viewpoints from multidisciplinary experts provide a well-rounded perspective This invaluable resource chronicles current knowledge in state-of-the-art skull base tumor imaging with clinical pearls on pathophysiology, prognosis, and treatment options. It is a must-have for radiology, neurosurgery, and otolaryngology residents and clinicians who care for patients with head and neck neoplasms.

Autoimmune Neurology - 2016-03-11

Autoimmune Neurology presents the latest information on autoimmune neurologic disease, the immune response to the body where organs run wild, causing the immune system to attack itself. Autoimmunity is a main element in numerous nervous system diseases and can target any structure within the central or peripheral nervous system. Over the past 20 years, significant advances in our understanding of the pathophysiology of autoimmune disorders, including the use of

biomarkers has led to new diagnosis and treatment options. Neurologic conditions associated with autoimmune reactions include dementia, neuromuscular disease, epilepsy, sleep disorders, diabetes, and other common neurologic disorders and disease. This current tutorial-reference will be a must-have title for clinical neurologists, research neurologists, neuroscientists, and any medical professional working with autoimmune disease and disorders. Includes comprehensive coverage of autoimmune neurology Details the latest techniques for the study, diagnosis, and treatment of diseases and disorders, including dementia, neuromuscular disease, epilepsy, and sleep disorders Presents a focused reference for clinical practitioners and the clinical neurology and neurology research communities

Cavernous Malformations - Issam A. Awad 1993

The massive convergence of information about cavernous malformations has been synthesized in this volume by experts in the field of pathology, neuroradiology and neurosurgery. Cavernous Malformations represents state-of-the-art knowledge about this lesion and the spectrum of opinion about its nature, clinical behavior and management strategies.

Highlights of Cavernous Malformations: Definition and pathologic features Epidemiology Diagnostic imaging Epilepsy Hemorrhage Conservative management Surgical intervention Microsurgical treatments Spinal cavernous malformations Pediatrics Radiotherapy (Distributed by Thieme for the American Association of Neurological Surgeons)

Pharmacist Services - Jon Schommer 2019-11-04

The overall goal of this book is to give the reader a state-of-the-art synopsis of the pharmacist services domain. To accomplish this goal, the authors have addressed the social, psychosocial, political, legal, historic, clinical, and economic factors that are associated with pharmacist services. In this book, you will gain cutting-edge insights from learning about the research of experts throughout the world. The findings have relevance for enhancing pharmacist professionalism, pharmacist practice, and the progression of pharmacist services in the future.

Global Tuberculosis Report 2016 - World Health Organization 2016-10-13

This global tuberculosis report is the first to be produced in the era of the SDGs and the End TB Strategy. It provides an assessment of the TB epidemic and progress in TB diagnosis, treatment and prevention efforts, as well as an overview of TB-specific financing and research. It also discusses the broader agenda of universal health coverage, social protection and other SDGs that have an impact on health. Data were available for 202 countries and territories that account for over 99% of the world's population and TB cases.

CURRENT Essentials of Medicine, Fourth Edition - Lawrence Tierney 2010-11-12

The perfect quick reference on the wards and in the clinic! The famous "one disease per page" design! CURRENT Essentials of Medicine is a practical, point-of-care pocket handbook that offers "nutshell" information on the diagnosis and treatment of more than 500 medical disorders seen in both primary care and hospital settings. Perfect as a quick reference on the wards or in a busy clinic, this is THE ONLY pocket guide to offer disease essentials in a one-disease-per-page bulleted format. Practical pearls, for which the authors are well known, are offered for almost all conditions. Features To-the-point information on the diagnosis and treatment of more than 500 of the most common diseases seen in clinical practice Convenient one-disease-per page presentation Bulleted data for each disease covering Essentials of Diagnosis, Differential Diagnosis, Treatment, Pearl, and Reference Encompasses both ambulatory and inpatient medicine Includes internal medicine, plus specialties such as obstetrics/gynecology, surgery, and pediatrics Updated clinical manifestations, diagnostic tests, and treatment considerations throughout

Cerebrovascular Neurosurgery - Dr Peter Nakaji 2019-08-15

Part of the Neurosurgery by Example series, this volume on cerebrovascular neurosurgery presents exemplary cases in which renowned authors guide readers through the assessment and planning, decision making, surgical procedure, after care, and complication management of common and uncommon disorders. The cases explore the spectrum of clinical diversity and complexity within cerebrovascular neurosurgery, including aneurysms, ischemic/occlusive disease, arteriovenous malformation, dural arteriovenous fistula, and more. Each chapter also contains 'pivot points' that illuminate changes required to manage patients in alternate or atypical situations, and pearls for accurate diagnosis, successful treatment, and effective complication management. Containing a focused review of medical evidence and expected outcomes, Cerebrovascular Neurosurgery is appropriate for

neurosurgeons who wish to learn more about a subspecialty, and those preparing for the American Board of Neurological Surgery oral examination.

Pediatric Hepatology - William F. Balistreri 1990-04-01

Third in a series of textbooks on pediatric disease primarily based on annual seminars held at the Gant in Aspen, Colorado as part of the Aspen conference on Pediatric Diseases, directed by the Institute for Pediatric Medical Education founded in 1981.

Comprehensive Dissertation Index: Mathematics & statistics. Physics, A-E - 1984

New Knowledge in a New Era of Globalization - Piotr Pachura 2011-08-01

To better understand the contemporary world, the world of innovation and technology, science should try to synthesize and assimilate social science in the development of our civilization. Does the new era require new knowledge? Does the age of globalization demand new education, new human attitudes? This book tries to clarify these questions. The book *New Knowledge in a New Era of Globalization* consists of 16 chapters divided into three sections: Globalization and Education; Globalization and Human Being; Globalization and Space. The Authors of respective chapters represent a great diversity of disciplines and methodological approaches as well as a variety of academic culture. This book is a valuable contribution and it will certainly be appreciated by a global community of scholars.

Sudan and Terrorism - United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on African Affairs 1997

The Master Adaptive Learner - William Cutrer 2019-09-29

Tomorrow's best physicians will be those who continually learn, adjust, and innovate as new information and best practices evolve, reflecting adaptive expertise in response to practice challenges. As the first volume in the American Medical Association's MedEd Innovation Series, *The Master Adaptive Learner* is an instructor-focused guide covering models for how to train and teach future clinicians who need to develop these adaptive skills and utilize them throughout their careers. Explains and clarifies the concept of a Master Adaptive Learner: a metacognitive approach to learning based on self-regulation that fosters the success and use of adaptive expertise in practice. Contains both theoretical and practical material for instructors and administrators, including guidance on how to implement a Master Adaptive Learner approach in today's institutions. Gives instructors the tools needed to empower students to become efficient and successful adaptive learners. Helps medical faculty and instructors address gaps in physician training and prepare new doctors to practice effectively in 21st century healthcare systems. One of the American Medical Association Change MedEd initiatives and innovations, written and edited by members of the ACE (Accelerating Change in Medical Education) Consortium - a unique, innovative collaborative that allows for the sharing and dissemination of groundbreaking ideas and projects.

Traditional Sudanese Medicine - Ahmed El Safi 2019-04-27

This is a wide-ranging 730-page account of traditional Sudanese medicine. I was born in the Sudan of Sudanese Muslim parents in Al-Dueim, on the west bank of the White Nile, central Sudan. I spent my early years in this town, and I went to school there. Since then, I have visited many towns and villages throughout the country. My mother tongue is Arabic, the main language of the country. I had a typical Sudanese childhood. I shared the daily life and activities of the people. My basic norms and values, I dare say, are those of the communities I describe in this book. At the age of four, I joined the khalwa (Quranic School), learned rudimentary Arabic, and memorized the first short chapters of the Holy Book. While I was there, I gained my first insight into the inner circle of religious healers, and at an early age, I saw the maseed (colloquial for mosque) and the Sufi followers. Many families in the Sudan have their patron saints that they consult or invoke in times of stress and need. Al-Mikashfi Abu-Umar of Shikanieba village, central Sudan, is the patron shaikh of our clan. At the age of five, my parents took me to his shrine, half a day's journey from my hometown. There, I saw the local asylum, for the first time, and was excited to see the mentally ill inmates under treatment. I had my first haircut there. My parents, with other worshippers, paid homage to the holy man. An impressive scene remained deeply engraved in my memory. During my childhood, I suffered every summer from attacks of epistaxis; I bled through the left nostril. Hospital treatment did not help. One morning my father decided to try his friend shaikh Awad Rahama, a laundry man in

the market place, who was known as a traditional healer as well. He was particularly noted for his effective recipes for nose bleeding. The shaikh welcomed us and asked me to sit. He washed my forehead with water, and on it wrote some Quranic verses in copying pencil. He then gave me a hijab (amulet) to wear. That was the last time I ever had epistaxis! During my early life, I wore a variety of amulets. Some were to combat the evil eye, some to ensure success at school, while others were hafidhas (protectors). Some were paper hijabs, and others were mihaya (erasure of holy verse) that I had to drink or bakhra to burn and fumigate myself with. Several types of treatment and healing séances are vivid in my memory. For example, I saw the bonesetter in action. There was one in every neighbourhood in every village or town. Many were notably skilful and experienced. They used no painkillers while setting a broken bone or manipulating a sprained joint, because they knew none, and, hence, had to work dexterously. I remember Al-faki Al-Zubair and Al-faki Hamoda, the two notable religious healers in our neighbourhood. They also led the congregation prayers, taught the Quran, and stood as masters of ceremonies in weddings. I joined the Quranic School of the first, and had many amulets and bakhras from the second. The therapeutic musical extravaganza of the zar is a popular feature in northern Sudan. The zar is an exclusively women's congregation in which lavish musical ceremonies are performed. Several times, I escaped my parents' notice, and sometimes-even school, to sneak into one of the zar houses. I found the ceremonies fascinating, and still remember them vividly, and with pleasure. The rhythm of the zar music and the heavy fragrances that escape from the ceremony houses are unforgettable. Many Muslim Sudanese towns have religious Sufi fraternities called turuq Sufiyya (Sufi orders). In these turuq, people perform zikr, remembrance chants in praise of the Prophet Muhammad and Sufi saints. The ceremonies range from the highly rhythmic type of the Qadiriyya order, to the quiet melodies of the Burhamiyya. We joined the zikr circles whenever there was a ceremony in the neighbourhood; we danced, chanted, and always waited for that dervish who would dance himself into a trance.

The national encyclopædia - National cyclopaedia 1867

Diabetic metabolism with high and low diets - Elliott Proctor Joslin 1923

Human Papillomavirus (HPV)-Associated Oropharyngeal Cancer - Daniel L. Miller 2015-08-01

Head and neck squamous cell carcinoma (HNSCC), the sixth most prevalent cancer worldwide, remains a very difficult disease to treat and cure despite intensive investigation into molecular etiologies and tumor progression pathways. Due to public health efforts encouraging smoking cessation, the overall incidence of HNSCC has decreased in recent years in many countries. In contrast, the incidence of oropharyngeal squamous cell carcinoma (OPSCC) has increased significantly, and this subtype of HNSCC is commonly associated with human papillomavirus (HPV) infection. Moreover, individuals with HPV-positive OPSCC are generally younger and are frequently non-smokers, suggesting that HPV-associated OPSCC represents a distinct biologic entity. This volume summarizes the spectrum of current HPV-associated OPSCC research from the fundamental basic science to translational surgery and treatment approaches. Chapters are contributed by authoritative leaders in the fields of research and clinical care. Initial chapters address epidemiology, behavioral correlates of HPV infection, and racial disparities in oropharyngeal cancer. This is followed by chapters detailing HPV virology with focus on viral transformation, viral replication, and host response to viral infection. The molecular biology of HPV-associated OPSCC is investigated in chapters detailing alterations in signaling networks and unique mutational profiles of human tumors. Clinical presentation, surgical perspectives, and treatment paradigms specific to HPV-associated OPSCC conclude the volume. This comprehensive volume provides an up-to-date overview of both scientific discovery and clinical management of this emerging public health problem.

OB/GYN Nurse Practitioner - National Learning Corporation 1994

The Certified Nurse Examination Series prepares individuals for licensing and certification conducted by the American Nurses Credentialing Center (ANCC), the National Certification Corporation (NCC), the National League for Nursing (NLN), and other organizations.

Islamic Psychology - G. Hussein Rassool 2021-03-31

Islamic Psychology or ilm an-nafs (science of the soul) is an important introductory textbook drawing on the latest evidence in the sub-disciplines of psychology to provide a balanced and comprehensive view

of human nature, behaviour and experience. Its foundation to develop theories about human nature is based upon the writings of the Qur'an, Sunna, Muslim scholars and contemporary research findings. Synthesising contemporary empirical psychology and Islamic psychology, this book is holistic in both nature and process and includes the physical, psychological, social and spiritual dimensions of human behaviour and experience. Through a broad and comprehensive scope, the book addresses three main areas: Context, perspectives and the clinical applications of applied psychology from an Islamic approach. This book is a core text on Islamic psychology for undergraduate and postgraduate students and those undertaking continuing professional development in Islamic psychology, psychotherapy and counselling. Beyond this, it is also a good supporting resource for teachers and lecturers in this field.

North Korea Sanctions Regulations (Us Office of Foreign Assets Control Regulation) (Ofac) (2018 Edition) - The Law The Law Library 2018-11-26

North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition) The Law Library presents the complete text of the North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition). Updated as of May 29, 2018 The Department of the Treasury's Office of Foreign Assets Control (OFAC) is amending the North Korea Sanctions Regulations and reissuing them in their entirety, in order to implement three recent Executive orders and to reference the North Korea Sanctions and Policy Enhancement Act of 2016 and the Countering America's Adversaries Through Sanctions Act. OFAC is also incorporating several general licenses that have, until now, appeared only on OFAC's website on the North Korea Sanctions page, adding several new general licenses, and adding and expanding provisions to issue a more comprehensive set of regulations that will provide further guidance to the public. Finally, OFAC is updating certain regulatory provisions and making other technical and conforming changes. Due to the number of regulatory sections being updated or added, OFAC is reissuing the North Korea Sanctions Regulations in their entirety. This book contains: - The complete text of the North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition) - A table of contents with the page number of each section

[Islamic Divorce in North America](#) - Julie Macfarlane 2012-04-30

Policy-makers and the public are increasingly attentive to the role of shari'a in the everyday lives of Western Muslims, with negative associations and public fears growing among their non-Muslim neighbors in the United States and Canada. The most common way North American Muslims relate to shari'a is in their observance of Muslim marriage and divorce rituals; recourse to traditional Islamic marriage and, to a lesser extent, divorce is widespread. Julie Macfarlane has conducted hundreds of interviews with Muslim couples, as well as with religious and community leaders and family conflict professionals. Her book describes how Muslim marriage and divorce processes are used in North America, and what they mean to those who embrace them as a part of their religious and cultural identity. The picture that emerges is of an idiosyncratic private ordering system that reflects a wide range of attitudes towards contemporary family values and changes in gender roles. Some women describe pervasive assumptions about restrictions on their role in the family system, as well as pressure to accept these values and to stay married. Others of both genders describe the gradual modernization of Islamic family traditions - and the subsequent emergence of a Western shari'a--but a continuing commitment to the rituals of Muslim marriage and divorce in their private lives. Readers will

be challenged to consider how the secular state should respond in order to find a balance between state commitment to universal norms and formal equality, and the protection of religious freedom expressed in private religious and cultural practices.

Comprehensive Dissertation Index - 1984

Vols. for 1973- include the following subject areas: Biological sciences, Agriculture, Chemistry, Environmental sciences, Health sciences, Engineering, Mathematics and statistics, Earth sciences, Physics, Education, Psychology, Sociology, Anthropology, History, Law & political science, Business & economics, Geography & regional planning, Language & literature, Fine arts, Library & information science, Mass communications, Music, Philosophy and Religion.

[Notes From Hell](#) - Nikolay Yordanov 2014-09

"This intimate account is relayed with raw honesty and emotion. A cold, sobering look at some of life's injustices." Michelle Bristow-Bovey, Cape Times, South Africa "One of the most emotional and revealing confessions". Telegraph Newspaper, Bulgaria "Great book! I couldn't put down until finished it! Very deep, emotional, heartfelt story of a strong women thrown in jail for something she has never done, but yet she has been prosecuted, tortured, went true traumatic years of undeserved punishment far from her home country. A must read!" Amazon.com Reader Review "This horror story made international headlines. It shows brutality in its most extreme form, a wilful act of cruel injustice for which the Libyan government stands accused. Reading this book will make you cry." Dries Brunt, Citizen Newspaper, South Africa

Darfur - Johan Brosché 2008

The Digestive System - Margaret E. Smith 2001

In this book, text covers the core anatomy and physiology. Coverage of the necessary basic science is clinically driven - clinical cases used throughout chapters. In addition to the extensive use of cases throughout the book, the final chapter gives a coverage of the major diseases of the system, equipping students for the much earlier contact with patients which occurs under the new curriculum. Contents - Overview of the digestive system. Mouth and oesophagus. The stomach basic functions. The stomach control. Pancreas exocrine functions. Liver and biliary system. Small intestine. Digestion and absorption. Absorptive and post-absorptive states. The colon. Gastrointestinal pathology.

Male Infertility and Sexual Dysfunction - Wayne J.G. Hellstrom 2012-12-06

An analysis of all the current avenues of treatment with emphasis on multidisciplinary considerations. Select international authorities present in-depth coverage of their areas of expertise, each topic covering the background, anatomy, physiology, diagnosis, classification, and treatment. Part I focuses on the study of male infertility and includes discussions of the basic sciences, office evaluation, laboratory and imaging techniques, and the use of testicular biopsy. This is followed by specialised chapters dealing with immunologic infertility, genital inflammation, reactive oxygen species, medical management, sperm processing and preventive adolescent andrology. Part II reflects a more diverse format in the coverage of sexual dysfunction and includes discussions of androgen insufficiency, nocturnal penile tumescence studies, neurotransmission, penile neurology, premature ejaculation, psychogenic impotence and the latest medical, non-invasive and surgical treatments.

[Diagnosis and Surgical Treatment of Epilepsy](#) - Warren W. Boling 2019-01-09

This book is a printed edition of the Special Issue "Diagnosis and Surgical Treatment of Epilepsy" that was published in Brain Sciences
