## **Religion and Place** - Peter Hopkins 2012-09-14

This unique collection highlights the importance of landscape, politics and piety to our understandings of religion and place. The geographies of religion have developed rapidly in the last couple of decades and this book provides both a conceptual framing of the key issues and debates involved, and rich illustrations through empirical case studies. The chapters span the discipline of human geography and cover contexts as diverse as veiling in Turkey, religious landscapes in rural Peru, and refugees and faith in South Africa. A number of prominent scholars and emerging researchers examine topical themes in each engaging chapter with significant foci being: religious transnationalism and religious landscapes; gendering of religious identities and contexts; fashion, faith and the body; identity, resistance and belief; immigrant identities, citizenship and spaces of belief; alternative spiritualities and places of retreat and enchantment. Together they make a series of important contributions that illuminate the central role of geography to the meaning and implications of lived religion, public piety and religious embodiment. As such, this collection will be of much interest to researchers and students working on topics relating to religion and place, including human geographers, sociologists, religious studies and religious education scholars.

**Letters from Robben Island** - Robert D. Vassen 1999-08-31

Late one night in July, 1963, a South African police unit surrounded the African National Congress headquarters in Rivonia and arrested a group of Movement leaders gathered inside. Eventually eight of them, including Nelson Mandela, who was already serving a sentence, Walter Sisulu, Dennis Goldberg, Govan Mbeki, Raymond Mhlaba, Elias Motosedi, Andrew Mangeni, and Ahmed Kathrada, were convicted of sabotage and, on June 12, 1964, sentenced to life in prison. Soon, these men became widely known as the "Rivonia Trialists." Despite their imprisonment, the Trialists played active roles in the struggle against South Africa's racist regime. Instead of being forgotten, as apartheid officials had hoped, they became enduring symbols in a struggle against injustice and racism. Kathrada and his colleagues were classified as high security prisoners, segregated from others and closely watched. Every activity was regulated and monitored. Among the many indignities visited upon them, the prisoners were prohibited from keeping copies of incoming and outgoing correspondence. Kathrada, or "Kathy" as he is known, successfully hid both. *Letters From Robben Island* contains a selection of

86 of the more than 900 pieces of correspondence Ahmed Kathrada wrote during his 26 years on Robben Island and at Pollsmoor Prison. Some were smuggled out by friends; others were written in code to hide meaning and content from prison censors. These are among his most poignant, touching, and eloquent communications. They are testimonies to Kathrada, his colleagues, and to their commitment to obtaining human dignity and freedom for all South Africans.

*Southeast Asian Independent Cinema* - Tilman Baumgärtel 2012-01-01

The rise of independent cinema in Southeast Asia, following the emergence of a new generation of filmmakers there, is among the most significant recent developments in global cinema. The advent of affordable and easy access to digital technology has empowered startling new voices from a part of the world rarely heard or seen in international film circles. The appearance of fresh, sharply alternative, and often very personal voices has had a tremendous impact on local film production. This book documents these developments as a genuine outcome of the democratization and liberalization of film production. Contributions from respected scholars, interviews with filmmakers, personal accounts and primary sources by important directors and screenwriters collectively provide readers with a lively account of dynamic film developments in Southeast Asia. Interviewees include Lav Diaz, Amir Muhammad, Apichatpong Weerasethakul, Eric Khoo, Nia Dinata and others. **Transforming Food Systems for a Rising India** - Andaleeb Rahman 2020-10-09

This open access book examines the interactions between India's economic development, agricultural production, and nutrition through the lens of a "Food Systems Approach (FSA)." The Indian growth story is a paradoxical one. Despite economic progress over the past two decades, regional inequality, food insecurity and malnutrition problems persist. Simultaneously, recent trends in obesity along with micro-nutrient deficiency portend to a future public health crisis. This book explores various challenges and opportunities to achieve a nutrition-secure future through diversified production systems, improved health and hygiene environment and greater individual capability to access a balanced diet contributing to an increase in overall productivity. The authors bring together the latest data and scientific evidence from the country to map out the current state of food systems and nutrition outcomes. They place India within the context of other developing country experiences and highlight India's status as an outlier in terms of the persistence of high levels of stunting while following global trends in obesity. This book discusses the policy and institutional interventions needed for promoting a nutrition-sensitive food system and the multi-sectoral strategies needed for simultaneously addressing the triple burden of malnutrition in India. **Contemporary Issues in Business and Economics** - Chia-Lin Chang 2020-07-01

This book is a collection of high-impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference (VBER2019) organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance, and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on "Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run" by Trang Thi-Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas

of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets the Asian region, from exchange rate regime, financial inclusion, and financial development to energy consumption and environmental degradation. On the issue of CO<sub>2</sub> emissions, energy consumption and economic growth in the ASEAN, Vo, Vo, and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide (CO<sub>2</sub>) emissions, energy consumption, renewable energy, population growth, and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar, and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability present investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country, such as Vietnam, with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen, Quan, and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho, and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model, which includes accounting factors with macroeconomic indicators, performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector, with the Health & Education sector demonstrating the most impressive recovery post-GFC, and the utilities sector recording a dramatic increase in bankruptcies post-GFC. At another extreme of the spectrum, Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR),

and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third, last but not least, various papers focus on an important aspect of public finance. For an example, Pham, Pham, and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition, regarding public finance for Vietnam, Nguyen, Vo, Ho, and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index together its two subcomponents, including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth, fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.
