The Language of Plants - Julia Graves 2012-05

"A powerful and unique book, *The Language of Plants* is without doubt the most in-depth discussion of plant signatures available to us today. A brilliant medical herbalist, Julia has drawn from ancient and modern sources and blended this knowledge with her own rich experience and personal wisdom to create a marvelous resource, designed to take us deeply into the healing energetics of plants. While reading it, I felt a modern alchemist at work." --Rosemary Gladstar, herbalist and author of *Rosemary Gladstar's Herbal Recipes for Vibrant Health* and *The Herbalist's Way* It is only in the age of technology that human beings have lost a sense of nature being alive. Throughout history, people spoke to nature, and nature communicated with them. During the Middle Ages, reading the "book of nature" was called the doctrine of signatures, which had always been an important part of interacting with nature for traditional healers and herbalists. "As a child, I just knew which plant to pick up and hold to my head for a headache to go away. Once I heard about the concept of a 'doctrine of signatures,' I would just stand silently, in awe of nature talking to me, talking and talking in her silent, direct speech. The book of nature seemed so obviously spelled out, and in oddest contrast to what I learned in medical school. My professors seemed never to have heard of nature being vibrant and alive and brimming with patterns of energy that are right there for us to understand and use.... This direct and primordial experience of being part of nature's omnipresent, cyclic course taught me more in the realm of no-words than any university ever could have." --Julia Graves *The Language of Plants* covers all aspects of the doctrine of signatures in an easily accessible format, so that everyone, whether nature lovers or healers, can learn to read the language of plants in connection with healing. Transhumanism - Scott de Hart 2012-11-06

The ultimate question is no longer "who am I" or "why am I here." These questions were answered in the earliest civilizations by philosophers and priests. Today we live in an age of such rapid advances in technology and science that the ultimate question must be rephrased: what shall we be? This book investigates what may become of human civilization, who is setting the agenda for a trans-humanistic civilization, and why . The modern Victor Frankenstein holds a high political office, carries diplomatic immunity, and is most likely funded by the largest corporations worldwide. His method is ancient: alchemy. His fraternities are well known and their secrets are well kept, but his goal of times past and present is the same; he dares to become as god, genetically manipulating the seeds of the earth, the beasts on the fields, and to claim legal ownership over humanity by re-creating it in his own image. This is no fairy tale, science fiction, or conspiracy theory ... it simply is!

Transhumanism, a Grimoire of Alchemical Agendas by Dr.'s. Joseph P. Farrell and Scott D. de Hart lifts the veil from the macabre transhumanistic monster being assembled and exposes the hidden history and agenda that has set humanity on a collision course for the Apocalypse. Joseph P. Farrell is the author of the best-selling *Genes, Giants, Monsters, and Men: The Surviving Elites of the Cosmic War and Their Hidden Agenda*.

A Compendium of Herbal Magick - Paul Beyerl 1998

Every plant has its own distinct spiritual energy or its own deva. Devas are the radiant light of the Universal Divine that permeates all things.

Since the earliest times, people were aware that all of Nature is divine. Great and wondrous myths were told that explained the presence of divine energy as it exists in thunder, in trees, and in sunlight. Some of this lore was the foundation of religions. But the simpler stories, such as those of a plant's energy, explored day-to-day matters like health and love. This understanding of the world has been preserved in folklore through poems, chants, ditties, and spells. From researching the history of folklore from cultures around the world, patterns emerge that enable us to approach the true nature of plants' devas. This compendium presents the lore and the corresponding usage for 330 magickal herbes. Great care was taken only to include folklore that was documented as authentic. You will meet many new herbes in this text and explore fascinating magickal and religi uses, but most of all, you will come to respect the divine that surrounds your everyday life.
