[Global Waste Management Outlook](#) - United Nations Environment Programme (UNEP) 2016-03-23

The Global Waste Management Outlook is the first comprehensive, impartial and in-depth assessment of global waste management. It reflects the collective body of recent scientific knowledge, drawing on the work of leading experts and the vast body of research undertaken

within and beyond the United Nations system. The six chapters inform the reader about trends, provide an analysis on governance and financial mechanisms, and offer policy advice on the way forward. The main document targeting professionals is accompanied by two summary documents, one for decision makers and the other for the public more broadly. This Global Waste Management Outlook offers a profound analysis of the enormous potential better waste management provides to assist in meeting the sustainability challenges ahead.

Non-Competition Interests in EU Antitrust Law - Or Brook 2022-04-30

This book is the first to empirically examine the role of non-competition interests (public policy) in the enforcement of the EU's prohibition on anti-competitive agreements. Based on an original quantitative and qualitative database of over 3,100 cases, this book records all of the public enforcement actions of Article 101 TFEU taken by the Commission, EU Courts, and the national competition authorities and courts of five representative Member States (France, Germany, Hungary, the Netherlands, and the UK). The book not only exposes explicit tools in which non-competition interests played a role, but also sheds light on the "dark matter" of balancing, namely, invisible forms of balancing triggered by the institutional and procedural setup of the competition enforcers. Moreover, it contributes to the empirical-legal study of various other aspects of EU competition law enforcement, such as its objectives, the more economic approach, decentralized enforcement, and the functioning and success of Regulation 1/2003.

Asbestos - Great Britain, Health and Safety Executive Staff 2006

This book replaces most earlier HSE guidance on licensed asbestos removal work. It is aimed at businesses holding a licence to work with asbestos, either repairing or removing asbestos-containing materials (ACMs), supervising such work, holding an ancillary license or providing training on asbestos. Employers who carry out work with asbestos insulation, asbestos insulating board using their own employees on their premises, who are exempted from the requirement to hold a licence, also need this guidance. The guidance is split into eight chapters, covering different aspects of licensed work with ACM's. It provides an overview of asbestos and its health effects, the law and how to work safely with asbestos.

Improving Global Worker Health and Safety Through Collaborative Capacity Building Initiatives - Thomas P. Fuller 2021-07-13

Many economically developing countries and nations without robust occupational hygiene (OH) educational programs endure a shortage of qualified occupational hygienists, resulting in higher rates of workplace injury, illness, and fatality. Damage to valuable infrastructure, environment, and public health also occurs without adequate support. *Improving Global Worker Health and Safety Through Collaborative Capacity Building Initiatives* outlines a broad variety of capacity building projects in OH. It also introduces detailed experiences of occupational hygienists working abroad and working on special global topics including a discussion of how global trade agreements influence the practice and policy within OH. It describes the special needs of informal workers who do not have a "typical" employer and special challenges of creating university curricular guidelines for OH, building competency, and increasing capacity. This book also informs experienced professionals in international OH-capacity building initiatives and directions. Features: Presents the global impact and importance of occupational hygienists Outlines knowledge and collaboration through networking Provides case studies on real world situations and problems This text will be useful for professionals and graduate students in the fields of occupational health and safety and public health.
