An Indigenous Peoples' History of the United States - Roxanne Dunbar-Ortiz 2015-08-11  
New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day

and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by

exterminating them.” Spanning more than four hundred years, this classic bottom-up peoples’ history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples’ History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

*Science of Life: Biology Parent Lesson Plan* -  
2013-08-01

The Science of Life: Biology Course Description  
This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility.  
Semester 1: Intro to Science Have you ever wondered about human fossils, “cave men,” skin color, “ape-men,” or why missing links are still missing? Want to discover when T. Rex was small enough to fit in your hand? Or how old dinosaur fossils are-and how we know the age of these bones? Learn how the Bibles’ world view (not evolution’s) unites evidence from science and history into a solid creation foundation for understanding the origin, history, and destiny of life-including yours! In Building Blocks in Science, Gary Parker explores some of the most interesting areas of science: fossils, the errors of evolution, the evidences for creation, all about early man and human origins, dinosaurs, and

even “races.” Learn how scientists use evidence in the present, how historians use evidence of the past, and discover the biblical world view, not evolution, that puts the two together in a credible and scientifically-sound way! Semester 2: Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator. Have you ever wondered about such captivating topics as genetics, the roll of natural selection, embryonic development, or DNA and the magnificent origins of life? Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular

institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process .

*Concepts of Biogeography & Astronomy Parent Lesson Planner* - 2014-03-18

Concepts of Biogeography & Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Biogeography It has been said that our planet is really just an insignificant speck in a vast universe, but that's not true! In fact, the conditions for life found on Earth are supremely unique and make our life here comfortable. This despite the reality that

the world around us is also tainted and in need of careful calibration to continue. This book opens a window to the spectacular environments found on our planet, from deserts to the tropics. Researcher and biologist Dr. Gary Parker brings his vast knowledge of ecology to a teaching setting, exploring and explaining ecosystems, population growth, habitats, adaptations, energy problems, and much more. Learn about insect control in California, why mammals have fur, and how sharks maintain “friendships” with small fish known as remora. Exploring the World Around You brings the varieties of our planet's habitats alive to the reader. Semester 2: Astronomy Think you know all there is to know about our solar system? You might be surprised at some of the amazing details that you find when you begin Exploring the World of Astronomy! From the rugged surface of the moon to the distant and mysterious constellations, this book provides an exciting educational tour for students of different ages

and skill levels. Learn about a blue moon, the 400-year storm on Jupiter, and what is meant by “the zone of life.” Discussion ideas, questions, and research opportunities help expand this great resource on observational astronomy into an unforgettable educational course for middle school to high school students!

Weekly Lesson Schedule Student Worksheets  
Quizzes & Test Answer Key 8th - 9th grade 1  
Year Science 1 Credit Features: Each suggested  
weekly schedule has three easy-to-manage  
lessons which combine reading, worksheets, and  
vocabulary-building opportunities including an  
expanded glossary for each book. Designed to  
allow your student to be independent, materials  
in this resource are divided by section so you  
can remove quizzes, tests, and answer keys  
before beginning the coursework. As always, you  
are encouraged to adjust the schedule and  
materials as you need to in order to best work  
within your educational program. Workflow:  
Students will read the pages in their book and  
then complete each section of the study guide  
worksheets. Tests are given at regular intervals  
with space to record each grade. Younger  
students may be given the option of taking open  
book tests. Lesson Scheduling: Space is given  
for assignment dates. There is flexibility in

scheduling. For example, the parent may opt for  
a M-W schedule rather than a M, W, F schedule.  
Each week listed has five days but due to  
vacations the school work week may not be M-F.

Rich Dad, Poor Dad - Robert T. Kiyosaki  
2016-04-27

Although we have been successful in our

careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

Concepts of Earth and Chemistry Course  
Description This is the suggested course  
sequence that allows one core area of science to  
be studied per semester. You can change the  
sequence of the semesters per the needs or  
interests of your student; materials for each  
semester are independent of one another to  
allow flexibility. Semester 1: Earth Blending a  
creationism perspective of history with  
definitions of terms and identification of famous  
explorers, scientists, etc., this book gives  
students an excellent initial knowledge of people  
and places, encouraging them to continue their

studies in-depth. Semester 2: Chemistry  
Chemistry is an amazing branch of science that  
affects us every day, yet few people realize it, or  
even give it much thought. Without chemistry,  
there would be nothing made of plastic, there  
would be no rubber tires, no tin cans, no  
televisions, no microwave ovens, or something  
as simple as wax paper. This book presents an  
exciting and intriguing tour through the realm of  
chemistry as each chapter unfolds with facts and  
stories about the discoveries of discoverers. Find  
out why pure gold is not used for jewelry or  
coins. Join Humphry Davy as he made many  
chemical discoveries, and learn how they  
shortened his life. See how people in the 1870s  
could jump over the top of the Washington  
Monument. Exploring the World of Chemistry
