The Burning Island - Hester Young 2019-02-12
The newest haunting mystery from the beloved author of The Gates of Evangeline, featuring Charlie Cates, a headstrong heroine who must confront her unwanted supernatural gift and bring dark secrets to light if she ever wants to leave the Big Island . . . Journalist Charlie Cates has always believed in facts, in what can be proved--her career depends on it. Which is why she has never truly accepted the supernatural visions that guide her to children in danger. After her work on a high-profile missing-child case brings unwanted fame, she reluctantly flees to the lush Big Island of Hawaii with her best friend, Rae. Determined to avoid her disturbing visions, Charlie begins writing what seems to be a harmless interview of a prominent volcanologist, Victor Nakagawa. But her hopes for a peaceful vacation are soon dashed by haunting dreams of a local girl who went missing six weeks earlier. In the small and sleepy town of Kalo Valley, Charlie and Rae come to realize that even paradise has its ugly secrets, and the Nakagawa family is no exception. In order to find the missing teenager and stop a dangerous predator from striking again, Charlie is forced to embrace the gift she has always tried to conceal. Meanwhile, someone is watching her every move, and the closer Charlie gets to the truth, the more distant her chances of ever leaving the island alive. With a deliciously eerie and fast-paced story told in vivid prose, all with an overlay of supernatural suspense, The Burning Island is a pulse-pounding mystery perfect for fans of Jennifer McMahon and Kate Atkinson.

Mobile Platforms and Development Environments - Sumi Helal 2012
Mobile platform development has lately become a technological war zone with extremely dynamic and fluid movement, especially in the smart phone and tablet market space. This Synthesis lecture is a guide to the latest developments of the key mobile platforms that are shaping the mobile platform industry. The book covers the three currently dominant native platforms -- iOS, Android and Windows Phone -- along with the device-agnostic HTML5 mobile web platform. The lecture also covers location-based services (LBS) which can be considered as a platform in its own right. The lecture utilizes a sample application (TwitterSearch) that the authors show programmed on each of the platforms. Audiences who may benefit from this lecture include: (1) undergraduate and graduate students taking mobile computing classes or self-learning the mobile platform programmability road map; (2) academic and industrial researchers working on mobile computing R&D projects; (3) mobile app developers for a specific platform who may be curious about other platforms; (4) system integrator consultants and firms concerned with mobilizing businesses and enterprise apps; and (5) industries including health care, logistics, mobile workforce management, mobile commerce and payment systems and mobile search and advertisement. Table of Contents: From the Newton to the iPhone / iOS / Android / Windows Phone / Mobile Web / Platform-in-Platform: Location-Based Services (LBS) / The Future of Mobile Platforms / TwitterSearch Sample Application
