At the Origin of the Christian

Claim - Luigi Giussani 1998

In *At the origin of the Christian claim* Liugi Giussani examines Christ's "claim" to identify himself with the mystery that is the ultimate answer to our search for the meaning of existence. Giussani argues that if we accept the hypothesis

that the mystery entered the realm of human existence and spoke in human terms, the relationship between the individual and God is no longer based on a moral, imaginative or aesthetic human effort but instead on coming upon an event in one's life. Thus the religious method is overturned by Christ; in Christianity it is no longer the person who seeks to know the mystery but the mystery that makes himself known by entering history. At the origin of the Christian claim presents an intriguing argument supported with ample documentation from the gospels and other theological writing.

Economics and Ecosystems -

Lars Hein 2010-01-01

A central issue in economics is the optimal allocation of scarce resources. Is efficient allocation indeed optimal and does it lead to sustainable solutions? Lars Hein contributes to this discussion at the interface of ecology and economics, and provides interesting case studies to test various theoretical approaches. The book is a must for both economists with an interest in ecology and for ecologists with an interest in economics! Ekko van Ierland, Wageningen University, the Netherlands *Economics and Ecosystems* demonstrates how the concepts of economic efficiency, sustainability and equity can be applied in ecosystem management. The book presents an overview of these

three concepts, a framework for their analysis and modelling, and three case studies. Specific attention is given to how complex ecosystem dynamics, such as thresholds or irreversible responses, influence ecosystem management options. The case studies focus on ecosystem dynamics and ecosystem services supply in a forest ecosystem, a Dutch wetland, and a rangeland in the Western Sahel. Integrating ecology and economics, this informative book will appeal to

postgraduate students in environmental sciences and environmental economics as well as ecosystem managers.

If Truth Be Told - Didier Fassin
2017-05-12
What happens when ethnographers go public via books, opinion papers, media interviews, court testimonies, policy recommendations, or advocacy activities? Calling for a consideration of this public moment as part and parcel of the research process, the contributors to *If Truth Be Told* explore the challenges,

difficulties, and stakes of having ethnographic research encounter various publics, ranging from journalists, legal experts, and policymakers to activist groups, local populations, and other scholars. The experiences they analyze include Didier Fassin's interventions on police and prison, Gabriella Coleman's multiple roles as intermediary between hackers and journalists, Kelly Gillespie's and Jonathan Benthall's experiences serving as expert witnesses, the impact of Manuela Ivone Cunha's and Vincent Dubois's work on public policies, and the vociferous attacks on the work of Unni Wikan and Nadia Abu El-Haj. With case studies from five continents, this collection signals the global impact of the questions that the publicization of ethnography raises about the public sphere, the role of the academy, and the responsibilities of social scientists. Consuming Behaviour - John Desmond 2002-08-14

This text seeks to overcome an imbalance in traditional consumer behaviour texts by incorporating biological, sociological and anthropological theories into the core of the work. The aim is to provide a challenging and interesting book which addresses important issues such as time, space and consumption; consuming needs and values, semiotics, identity, the body, eating disorders and drug-taking. The text seeks to adopt a neutral view of consuming behaviour rather than the more traditional adoption of the producers' perspective, and to look at the contemporary issues affecting consuming behaviour in today's world.

Health 4.0: How Virtualization and Big Data are Revolutionizing Healthcare - Christoph Thuemmler

2017-01-07

This book describes how the creation of new digital services—through vertical and horizontal integration of data coming from sensors on top of existing legacy systems—that has already had a major impact on industry is now extending to healthcare. The book describes the fourth industrial revolution (i.e. Health 4.0), which is based on virtualization and service aggregation. It shows how sensors, embedded systems, and cyber-physical systems are fundamentally changing the way industrial processes work, their business models, and how we consume, while also affecting the health and care domains. Chapters describe the technology behind the shift of point of care to point of need and away from hospitals and institutions; how care will be delivered virtually outside hospitals; that services will be tailored to individuals rather than being designed as statistical averages; that data analytics will be used to help patients to manage their chronic conditions with help of

smart devices; and that pharmaceuticals will be interactive to help prevent adverse reactions. The topics presented will have an impact on a variety of healthcare stakeholders in a continuously global and hyper-connected world. · Presents explanations of emerging topics as they relate to e-health, such as Industry 4.0, Precision Medicine, Mobile Health, 5G, Big Data, and Cyber-physical systems; · Provides overviews of technologies in addition to possible application scenarios and market conditions; · Features comprehensive demographic and statistic coverage of Health 4.0 presented in a graphical manner.

Microeconomics - Michael L. Katz 1998

This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk and uncertainty, assymetric information and game theory. Traditional topics

are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost, and examples are included throughout the text to reinforce the material presented.

Why the Church? - Luigi Giussani 2001

From its beginnings, the Church has presented itself as a human phenomenon that carries the divine within it. As a social fact, its reality given form by men and women, the Church has always affirmed that its existence surpasses the human reality of its components and that it stands as the continuation of the event of Christ's entry into human history. *Why the Church?*, the final volume in McGill-Queen's University Press's trilogy of Luigi Giussani's writings, explores the Church's definition of itself as both human and divine and evaluates the truth of this claim.

The Child of Pleasure -

Gabriele D'Annunzio 2006
Originally published in 1889, this work's protagonist Andrea Sperelli introduced the Italian culture to aestheticism and a taste for decadence. The young count seeks beauty, despises the bourgeois world, and rejects the basic rules of morality and social interaction. His corruption is evident in his sadistic superimposing of two women.

Hope in the Age of Anxiety -

Anthony Scioli 2009-09-03
Economic collapse, poverty, disease, natural disasters, the constant threat of community unrest and international terrorism--a quick look at any newspaper is enough to cause almost anyone to feel trapped and desperate. Yet the recent election also revealed a growing search for hope spreading through society. In the timely Hope in the Age of Anxiety, Anthony Scioli and Henry Biller illuminate the nature of hope and offer a multitude of techniques designed to improve the lives

of individuals, and bring more light into the world. In this fascinating and humane book, Scioli and Biller reveal the ways in which human beings acquire and make use of hope. Hope in the Age of Anxiety is meant to be a definitive guide. The evolutionary, biological, and cultural roots of hope are covered along with the seven kinds of hope found in the world's religions. Just as vital, the book provides many personal tools for addressing the major challenges of the human condition: fear, loss, illness, and death. Some of the key areas illuminated in Hope in the Age of Anxiety: How do you build and sustain hope in trying times? How can hope help you to achieve your life goals? How can hope improve your relationships with others? How can hope aid your recovery from trauma or illness? How does hope relate to spirituality? Hope in the Age of Anxiety identifies the skills needed to cultivate hope, and offers suggestions for using these capacities to realize your life goals, support health and

healing, strengthen relationships, enhance spirituality, and inoculate yourself against the despair that engulfs many individuals. Organization Theory and Design - Jonathan Murphy 2014

The School and Society - John Dewey 1915

First published in 1899, "The School and Society" describes John Dewey's experiences with his own famous Laboratory School, started in 1896.

Dewey's experiments at the Laboratory School reflected his original social and educational philosophy based on American experience and concepts of democracy, not on European education models then in vogue. This forerunner of the major works shows Dewey's per-vasive concern with the need for a rich, dynamic, and viable society. In his introduction to this volume, Joe R. Burnett states Dewey's theme. Industrialization, urbanization, science, and technology have created a revolution the schools cannot ignore. Dewey carries this theme through eight chapters: The School and Social Progress; The School and the

Life of the Child; Waste in Education; Three Years of the University Elementary School; The Psychology of Elementary Education; Froebel's Educational Principles; The Psychology of Occupations; and the Development of Attention.

Another World Is Possible - William Fisher 2015-05-14

In 2001 the first World Social Forum was held in Porto Alegre, Brazil. The meeting was viewed by many at the time as a new manifestation of the global Left, a people's opposition to the World Economic Forum that stood as the first real front to global capitalism since the collapse of the Soviet Union. While many activists and intellectuals on the left have since become deeply critical of the Forum, newer movements, such as Occupy, the Arab Spring and the indignados, have built upon its successes and innovations. Another World is Possible is the original collection of essays and demands from the heart of the 'movement of movements'. Based on the work of the first two annual meetings of the

WSF, this classic collection not only set out the initial aims of the movements that came together, it also paved the way for the theoretical study of new social movements, their multiple and participatory character. Today, as many crises affect all our lives, it is time to revisit the original demands of a global solidarity movement, united in its determination to fight against the concentration of wealth, the proliferation of poverty and inequalities, and the destruction of our earth, and to reconstitute a global left.

English - One Tongue, Many Voices - Jan Svartvik
2016-01-19

This is the fully revised and expanded second edition of *English - One Tongue, Many Voices*, a book by three internationally distinguished English language scholars who tell the fascinating, improbable saga of English in time and space. Chapters trace the history of the language from its obscure beginnings over 1500 years ago as a collection of dialects spoken by marauding,

illiterate tribes. They show how the geographical spread of the language in its increasing diversity has made English into an international language of unprecedented range and variety. The authors examine the present state of English as a global language and the problems, pressures and uncertainties of its future, online and offline. They argue that, in spite of the amazing variety and plurality of English, it remains a single language.

In doing so, this book revolves around a simple idea: to properly understand European financial rules, it is necessary to identify the paradigms that like 'deep currents' run underneath them, in order to capture their proper meaning and finality and to measure their consistency and proportionality. This book is meant to be, therefore, a conversation about the rationale(s) of the rules and tools of European financial law as well as on the needs for future simplification and reform (proposals for simplification are part of the exercise)."--

NGOization - Aziz Choudry
2013-07-11

The growth and spread of non-governmental organizations (NGOs) at local and international levels has attracted considerable interest and attention from policy-makers, development practitioners, academics and activists around the world. But how has this phenomenon impacted on struggles for social and environmental justice? How has it challenged - or reinforced - the forces of capitalism and colonialism? And what political, economic, social and cultural interests does this serve? NGOization - the professionalization and institutionalization of social action - has long been a hotly contested issue in grassroots social movements and communities of resistance. This book pulls together for the first time unique perspectives of social struggles and critically engaged scholars from a wide range of geographical and

political contexts to offer insights into the tensions and challenges of the NGO model, while considering the feasibility of alternatives.

The Digital Public Domain - Melanie Dulong De Rosnay 2012

Digital technology has made culture more accessible than ever before. Texts, audio, pictures and video can easily be produced, disseminated, used and remixed using devices that are increasingly user-friendly and affordable. However, along with this technological democratization comes a paradoxical flipside: the norms regulating culture's use - copyright and related rights - have become increasingly restrictive. This book brings together essays by academics, librarians, entrepreneurs, activists and

policy makers, who were all part of the EU-funded Communia project. Together the authors argue that the Public Domain - that is, the informational works owned by all of us, be that literature, music, the output of scientific research, educational material or public sector information - is fundamental to a healthy society. The essays range from more theoretical papers on the history of copyright and the Public Domain, to practical examples and case studies of recent projects that have engaged with the principles of Open Access and Creative Commons licensing. The book is essential reading for anyone interested in the current debate about copyright and the Internet. It opens up discussion and offers practical solutions to

the difficult question of the regulation of culture at the digital age.
