Ecoliterate - Daniel Goleman 2012-07-31

A new integration of Goleman's emotional,

social, and ecological intelligence. Hopeful, eloquent, and bold, Ecoliterate offers inspiring stories, practical guidance, and an exciting new model of education that builds - in vitally important ways - on the success of social and emotional learning by addressing today's most important ecological issues. This book shares stories of pioneering educators, students, and activists engaged in issues related to food, water, oil, and coal in communities from the mountains of Appalachia to a small village in the Arctic; the deserts of New Mexico to the coast of New Orleans; and the streets of Oakland, California to the hills of South Carolina. Ecoliterate marks a rich collaboration between Daniel Goleman and the Center for Ecoliteracy, an organization best known for its pioneering work with school gardens, school lunches, and integrating ecological principles and sustainability into school curricula. For nearly twenty years the Center has worked with schools and organizations in more than 400 communities

across the United States and numerous other countries. Ecoliterate also presents five core practices of emotionally and socially engaged ecoliteracy and a professional development guide.

What Makes a Leader? (Harvard Business Review Classics) - Daniel Goleman 2017-06-06

When asked to define the ideal leader, many would emphasize traits such as intelligence, toughness, determination, and vision—the qualities traditionally associated with leadership. Often left off the list are softer, more personal qualities—but they are also essential. Although a certain degree of analytical and technical skill is a minimum requirement for success, studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate. Psychologist and author Daniel Goleman first brought the term "emotional intelligence" to a wide audience with his 1995 book of the same name, and Goleman first applied the concept to

business with a 1998 classic Harvard Business Review article. In his research at nearly 200 large, global companies, Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence. Without it, a person can have first-class training, an incisive mind, and an endless supply of good ideas, but he or she still won't be a great leader. The chief components of emotional intelligence—self-awareness, self-regulation, motivation, empathy, and social skill—can sound unbusinesslike, but Goleman found direct ties between emotional intelligence and measurable business results. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Destructive Emotions - Daniel Goleman

2014-07-12

Can the worlds of science and philosophy work together to recognise our destructive emotions such as hatred, craving, and delusion? Bringing together ancient Buddhist wisdom and recent breakthroughs in a variety of fields from neuroscience to child development, Daniel Goleman's extraordinary book offers fresh insights into how we can recognise and transform our destructive emotions. Out of a week-long discussion between the Dalai Lama and small group of eminent psychologists, neuroscientists, and philosophers, Goleman weaves together a compelling narrative account. Where do these destructive emotions (craving, anger and delusion, known in Buddhism as the three poisons) come from? And how can we transform them to prevent them from threatening humanity's collective safety and its future?

Collaborative Intelligence - Dawna Markova

2015-08-11

A breakthrough book on the transformative power of collaborative thinking Collaborative intelligence, or CQ, is a measure of our ability to think with others on behalf of what matters to us all. It is emerging as a new professional currency at a time when the way we think, interact, and innovate is shifting. In the past, "market share" companies ruled by hierarchy and topdown leadership. Today, the new market leaders are "mind share" companies, where influence is more important than power, and success relies on collaboration and the ability to inspire. Collaborative Intelligence is the culmination of more than fifty years of original research that draws on Dawna Markova's background in cognitive neuroscience and her most recent work, with Angie McArthur, as a "Professional Thinking Partner" to some of the world's top CEOs and creative professionals. Markova and McArthur are experts at getting brilliant yet difficult people to think together.

They have been brought in to troubleshoot for Fortune 500 leaders in crisis and managers struggling to inspire their teams. When asked about their biggest challenges at work, Markova and McArthur’s clients all cite a common problem: other people. This response reflects the way we have been taught to focus on the gulfs between us rather than valuing our intellectual diversity—that is, the ways in which each of us is uniquely gifted, how we process information and frame questions, what kind of things deplete us, and what engages and inspires us. Through a series of practices and strategies, the authors teach us how to recognize our own mind patterns and map the talents of our teams, with the goal of embarking together on an aligned course of action and influence. In Markova and McArthur’s experience, managers who appreciate intellectual diversity will lead their teams to innovation; employees who understand it will thrive because they are in touch with their

strengths; and an entire team who understands it will come together to do their best work in a symphony of collaboration, their individual strengths working in harmony like an orchestra or a high-performing sports team. Praise for Collaborative Intelligence “Rooted in the latest neuroscience on the nature of collaboration, Collaborative Intelligence celebrates the power of working and thinking together at the highest levels of business and politics, and in the smallest aspects of our everyday lives. Dawna Markova and Angie McArthur show us that our ability to collaborate is not only a measure of intelligence, but essential to solving the world’s problems and seeing the possibilities in ourselves and others.”—Arianna Huffington “This inspiring book teaches you how to align your intention with the intention of others, and how, through shared strengths and talents, you have every right to expect greatness and set the highest goals and expectations.”—Deepak Chopra “Everyone talks about collaboration

today, but the rhetoric typically outweighs the reality. Collaborative Intelligence offers tangible tools for those serious about becoming ‘system leaders’ who can close the gap and make collaboration real.”—Peter M. Senge, author of *The Fifth Discipline* “I have worked with Markova and McArthur for several years, focusing on achieving better results through intellectual diversity. Their approach has encouraged more candid debate and collaborative behavior within the team. The team, not individuals, becomes the hero.”—Al Carey, CEO, PepsiCo

Emotional Intelligence was an international

phenomenon, appearing on the New York Times bestseller list for over a year and selling more than five million copies worldwide. Now, once again, Daniel Goleman has written a groundbreaking synthesis of the latest findings in biology and brain science, revealing that we are “wired to connect” and the surprisingly deep impact of our relationships on every aspect of our lives. Far more than we are consciously aware, our daily encounters with parents, spouses, bosses, and even strangers shape our brains and affect cells throughout our bodies—down to the level of our genes—for good or ill. In *Social Intelligence*, Daniel Goleman explores an emerging new science with startling implications for our interpersonal world. Its most fundamental discovery: we are designed for sociability, constantly engaged in a “neural ballet” that connects us brain to brain with those around us. Our reactions to others, and theirs to us, have a far-reaching biological impact, sending out cascades of hormones that regulate

everything from our hearts to our immune systems, making good relationships act like vitamins—and bad relationships like poisons. We can “catch” other people’s emotions the way we catch a cold, and the consequences of isolation or relentless social stress can be life-shortening. Goleman explains the surprising accuracy of first impressions, the basis of charisma and emotional power, the complexity of sexual attraction, and how we detect lies. He describes the “dark side” of social intelligence, from narcissism to Machiavellianism and psychopathy. He also reveals our astonishing capacity for “mindsight,” as well as the tragedy of those, like autistic children, whose mindsight is impaired. Is there a way to raise our children to be happy? What is the basis of a nourishing marriage? How can business leaders and teachers inspire the best in those they lead and teach? How can groups divided by prejudice and hatred come to live together in peace? The answers to these questions may not be as elusive as we once

thought. And Goleman delivers his most heartening news with powerful conviction: we humans have a built-in bias toward empathy, cooperation, and altruism—provided we develop the social intelligence to nurture these capacities in ourselves and others.
