Atkinson and Hilgard's Introduction to Psychology - 2009

The Stanze of Angelo Poliziano - 2010-11-01

Hope in the Age of Anxiety - Anthony Scioli 2009-09-03

Economic collapse, poverty, disease, natural disasters, the constant threat of community unrest and international terrorism--a quick look at any newspaper is enough to cause almost anyone to feel trapped and desperate. Yet the recent election also revealed a growing search for hope spreading through society. In the timely *Hope in the Age of Anxiety*, Anthony Scioli and Henry Biller illuminate the nature of hope and offer a multitude of techniques designed to improve the lives of individuals, and bring more light into the world. In this fascinating and humane book, Scioli and Biller reveal the ways in which human beings acquire and make use of hope. *Hope in the Age of Anxiety* is meant to be a definitive guide. The evolutionary, biological, and cultural roots of hope are covered along with the seven kinds of hope found in the world's religions. Just as vital, the book provides many personal tools for addressing the major challenges of the human condition: fear, loss, illness, and death. Some of the key areas illuminated in *Hope in the Age of Anxiety*: How do you build and sustain hope in trying times? How can hope help you to achieve your life goals? How can hope improve your relationships with others? How can hope aid your recovery from trauma or illness? How does hope relate to spirituality? *Hope in the Age of Anxiety* identifies the skills needed to cultivate hope, and offers suggestions for using these capacities to realize your life goals, support health and healing, strengthen relationships, enhance spirituality, and inoculate yourself against the despair that engulfs many individuals.

The Child of Pleasure - Gabriele D'Annunzio 2006

Originally published in 1889, this work's protagonist Andrea Sperelli introduced the Italian culture to aestheticism and a taste for decadence. The young count seeks beauty, despises the bourgeois world, and rejects the basic rules of morality and social interaction. His corruption is evident in his sadistic superimposing of two women.

Neo-classicism - Hugh Honour 1977

Stardom in Cinema, Television and the Web - Vanni Codiluppi 2021-03-01

In the last 50 years, the social importance of stars has steadily grown, to the point that stars have now become key role models who strongly influence people's behaviours. This book considers the connections between the three main media (cinema, television and the web) and each of the three phases into which the history of stardom can be divided. The first phase can largely be credited with the creation and codification of contemporary stardom, while the second is linked to the spread of television, which weakened the Hollywood stardom model and gradually transformed the figure of the star, making it more intimate and familiar. In the last of these phases, we have many 'outsiders' (personalities from a variety of professional

domains and experiences) who are able to achieve considerable social visibility thanks to their skilful use of the web.

Essentials of Social Psychology - Michael Hogg 2009-12-14

Essentials of Social Psychology provides a clear, concise and engaging introduction to the field. Covering all the major topics and theoretical perspectives, this exciting new book provides straightforward explanation of key terms and concepts in a lively and student-friendly manner. Debates and controversies are brought to life and the wider practical relevance of the subject is emphasised throughout. Pedagogical features that appear across the book include Research Classic sections which describe classic studies, Research Applications boxes that highlight more contemporary developments in social psychological research and their practical applications, Real World features that look at the everyday relevance of social psychology, and Literature, Film and TV features that demonstrate how social psychological concepts are dealt with in popular media. An international balance of research alerts students to the cross cultural dimensions of social psychology *Essentials of Social Psychology* is accompanied by MyPsychLab, an interactive online study resource designed to help students to consolidate and further their understanding. Together, the book and online support make this an ideal resource for those studying the subject for the first time, or as part of a more general programme of study.

Anthology of Italian Psychiatric Texts - Mario Maj 2008-09-15

Gender and Media - Tonny Krijnen 2021-10-28

This thoroughly revised second edition provides a critical overview of the contemporary debates and discussions surrounding gender and mediated communication. The book is divided into three parts: representing, producing, and consuming, with each section made up of three chapters. The first chapter of each section attempts to answer the most basic questions: 'Who is represented?', 'Who produces what?', and 'Who consumes what?'. The second chapter of each section draws attention to the complexity of the relationship between gender and media, concentrating on the 'why'. The third and final chapter of each section addresses the latest debates in the fields of media and gender, adding a vital layer of understanding of the topic at hand. Throughout, text boxes provide additional information on the most important concepts and topics, and exercises help bridge the gap between theory and everyday life media practices. The second edition has been updated in light of current developments with regard to gender, media technologies, and globalisation, including recent theoretical insights and examples. This is an ideal textbook for students studying gender and media, and for general courses on gender studies, sociology, cultural studies, and women's studies.

Pharmaceutical Microbiology - William Barry Hugo 1977

Born to Win: Transactional Analysis with Gestalt Experiments - Muriel James 1981

Master Classes #7 - Elaine Pagels 1957-01

Novacene - James Lovelock 2020-11-10

A fascinating new study from the originator of the Gaia Theory, "who conceived the first wholly new way of

looking at life on earth since Charles Darwin" (Independent) One of the world's leading scientific thinkers offers a vision of a future epoch in which humans and artificial intelligence unite to save the Earth James Lovelock, creator of the Gaia hypothesis and the greatest environmental thinker of our time, has produced an astounding new theory about future of life on Earth. He argues that the Anthropocene—the age in which humans acquired planetary-scale technologies—is, after 300 years, coming to an end. A new age—the Novacene—has already begun. In the Novacene, new beings will emerge from existing artificial intelligence systems. They will think 10,000 times faster than we do and they will regard us as we now regard plants. But this will not be the cruel, violent machine takeover of the planet imagined by science fiction. These hyperintelligent beings will be as dependent on the health of the planet as we are. They will need the planetary cooling system of Gaia to defend them from the increasing heat of the sun as much as we do. And Gaia depends on organic life. We will be partners in this project. It is crucial, Lovelock argues, that the intelligence of Earth survives and prospers. He does not think there are intelligent aliens, so we are the only beings capable of understanding the cosmos. Perhaps, he speculates, the Novacene could even be the beginning of a process that will finally lead to intelligence suffusing the entire cosmos. At the age of 100, James Lovelock has produced the most important and compelling work of his life.

Art Since 1900 - Hal Foster 2005-05-01

A landmark in art history and the most anticipated art publishing event of the new millennium. In this groundbreaking and original work of scholarship, four of the most influential and provocative art historians of our time have come together to provide a comprehensive history of art in the twentieth century, an age when artists in the United States, Europe, and elsewhere sought to overturn the traditions of the past and expectations of the present in order to invent new practices and forms. Adopting a unique year-by-year approach, Foster, Krauss, Bois, and Buchloh present more than 100 short essays, each focusing on a crucial event—the creation of a seminal work, the publication of an artistic manifesto, the opening of a major exhibition—to tell the story of the dazzling diversity of practice and interpretation that characterizes the art of the period. All the turning points and breakthroughs of modernism and postmodernism are explored in depth, as are the frequent and sustained antimodernist reactions that proposed alternative visions of art and the world. Illustrating the authors' texts are more than 600 of the most important works of the century, many reproduced in full color. The book's flexible structure and extensive cross-referencing allow readers to follow any one of the many narratives that unfold, whether that be the history of a medium such as photography or painting, the development of art in a particular country, the influence of a movement such as surrealism or feminism, or the emergence of a stylistic or conceptual category like abstraction or minimalism. Boxes give further background information on the important figures and issues. In their insightful introductions, the four authors explain the different methods of art history at work in the book, providing the reader with the conceptual tools for further study. Two roundtable discussions --one at midcentury, the other at the close of the book--consider the questions raised by the preceding decades and look ahead to the art of the future. A glossary of terms and concepts completes this extraordinary volume. 600 illustrations, 400 in color. This college edition also includes the "Art 20" CD-ROM.

La consulenza di processo - Edgar H. Schein 2001

Macroeconomics - Olivier Blanchard 2021

An integrated, global view of macroeconomics, showing the connections between goods markets, financial markets, and labour markets worldwide. This is a book rooted in the real-world: from the major economic crisis of the late 2000s to the profound economic effects caused by the COVID-19 pandemic, from monetary policy in the US, to Brexit, the problems of the Euro area and growth in China, it will help your students make sense not only of current macroeconomic events but also those that may unfold in the future.

Fascist Italy and Nazi Germany - Alexander J. De Grand 2004

This comparative study of Italian Fascism and German Nazism examines the similarities and differences in the formation and early development of the two regimes, the role of the party, the position of the leaders and policies towards women and youth. Previous ed.: 1995.

The Anatomy of Human Destructiveness - Erich Fromm 2013-02-26

A study of aggression from the renowned social psychologist and New York Times–bestselling author of *The*

Art of Loving and *Escape from Freedom*. Throughout history, humans have shown an incredible talent for destruction as well as creation. Aggression has driven us to great heights and brutal lows. In *The Anatomy of Human Destructiveness*, renowned social psychologist Erich Fromm discusses the differences between forms of aggression typical for animals and two very specific forms of destructiveness that can only be found in human beings: sadism and necrophilic destructiveness. His case studies span zoo animals, necrophiliacs, and the psychobiographies of notorious figures such as Adolf Hitler and Joseph Stalin. Through his broad scholarship, Fromm offers a comprehensive exploration of the human impulse for violence. This ebook features an illustrated biography of Erich Fromm including rare images and never-before-seen documents from the author's estate.

Neuropsychology of Communication - Michela Balconi 2010-09-08

In this volume, the communicative and neuropsychological correlates of daily interactions are discussed. The predominant account on explaining the construction of meaning by humans is the inter-relational perspective, that postulates an intentional convergence of meaning arising as a consequence of the active exchanges between people. The neural correlates of communication were illustrated in the light of new empirical results, considering the main topics of: a) language and language development; b) pragmatics and neuropragmatics of communication; c) neurocognition and the cognitive bases of intentions; d) nonverbal communication and emotion contribution to the communicative systems. New methodological approaches are considered, with particular attention to neuroimaging (such as PET and fMRI) and brain stimulation techniques (as MEG and TMS), as well as their application to the clinical field.

Critical Conversations - Susan Gross Forneris 2017-09

With today's health care systems demanding not only capable nurses but also reflective practitioners, nurse educators are challenged more than ever to engage students in making sense of their experiences and responding thoughtfully to diverse situations. *Critical Conversations* helps nursing educators discover how better listening can lead to better learning with insightful guidance on the conversations that drive effective understanding for both instructors and students. Applying *The NLN Guide for Teaching Thinking*, this monograph helps nursing educators practice and implement the most effective strategies for fostering critical conversations across simulation, classroom, and clinical learning environments. From conceptualizing learning as meaning making to the cognitive strategy of being critical and engaging learners through purposeful learning conversations, straightforward exemplars throughout the text offer a support structure to guide educators in helping students learn to think deeply and critically in any setting.

Microeconomics - Robert Paul Thomas 1990

NGOization - Aziz Choudry 2013-07-11

The growth and spread of non-governmental organizations (NGOs) at local and international levels has attracted considerable interest and attention from policy-makers, development practitioners, academics and activists around the world. But how has this phenomenon impacted on struggles for social and environmental justice? How has it challenged - or reinforced - the forces of capitalism and colonialism? And what political, economic, social and cultural interests does this serve? *NGOization* - the professionalization and institutionalization of social action - has long been a hotly contested issue in grassroots social movements and communities of resistance. This book pulls together for the first time unique perspectives of social struggles and critically engaged scholars from a wide range of geographical and political contexts to offer insights into the tensions and challenges of the NGO model, while considering the feasibility of alternatives.

Process Consultation - Edgar H. Schein 2000

Volume II clarifies the concept of process consultation as a viable model of how to work with human systems as defined in the previous volume, *Process Consultation: Its Role in Organization Development* (1969), and introduces modifications and new ideas that elaborate on and have evolved beyond the material in the first volume.

Spoken Into the Void - Adolf Loos 1987-01

The Vienna Jubilee Exhibition of 1898 provided the occasion for these remarkable essays by the Austrian architect, theorist, and irreverent critic of his own culture, Adolf Loos. The rational underpinnings of his

later accusation that "ornament is crime," first appear in these polemical thrusts at the stylized work of Viennese successionists Joseph Hoffmann, Otto Wagner, Hermann Obrist, and Gustav Klimt, among others.

Another World Is Possible - William Fisher 2015-05-14

In 2001 the first World Social Forum was held in Porto Alegre, Brazil. The meeting was viewed by many at the time as a new manifestation of the global Left, a people's opposition to the World Economic Forum that stood as the first real front to global capitalism since the collapse of the Soviet Union. While many activists and intellectuals on the left have since become deeply critical of the Forum, newer movements, such as Occupy, the Arab Spring and the indignados, have built upon its successes and innovations. Another World is Possible is the original collection of essays and demands from the heart of the 'movement of movements'. Based on the work of the first two annual meetings of the WSF, this classic collection not only set out the initial aims of the movements that came together, it also paved the way for the theoretical study of new social movements, their multiple and participatory character. Today, as many crises affect all our lives, it is time to revisit the original demands of a global solidarity movement, united in its determination to fight against the concentration of wealth, the proliferation of poverty and inequalities, and the destruction of our earth, and to reconstitute a global left.

Natural Resource Economics: The Essentials - Tom Tietenberg 2019-08-01

Natural Resource Economics: The Essentials offers a policy-oriented approach to the increasingly influential field of natural resource economics that is based upon a solid foundation of economic theory and empirical research. Students will not only leave the course with a firm understanding of natural resource economics, but they will also be exposed to a number of case studies showing how underlying economic principles provide the basis for specific natural resource policies. Including current data and research studies, this key text also highlights what insights can be derived from the actual experience. Key features include: Extensive coverage of the major issues including energy, recyclable resources, water policy, land conservation and management, forests, fisheries, other ecosystems, and sustainable development; Introductions to the theory and method of natural resource economics including externalities, experimental and behavioral economics, benefit-cost analysis, and methods for valuing the services provided by the environment; Boxed 'Examples' and 'Debates' throughout the text which highlight global examples and major points for deeper discussions. The text is fully supported with end-of-chapter summaries, discussion questions, and self-test exercises in the book, as well as with multiple-choice questions, simulations, references, slides, and an instructor's manual on the Companion Website. This text is adapted from the best-selling Environmental and Natural Resource Economics, 11th edition, by the same authors.

Resilient Adults - Gina O'Connell Higgins 1996-03-15

Offering an approach that focuses on the origins of mental health rather than the beginnings of mental illness, this book outlines how men and women can recognize the resilient traits they possess and foster the strength to overcome tragedy. An inspiring and invigorating book! I recommend it to the courageous women and men who struggle each day to overcome their own cruel pasts, to the therapists who work with them, and to anyone interested in the relationship between adult development and mental health."--Robert Kegan, Harvard University and the Massachusetts School of Professional Psychology

Microeconomics - Michael L. Katz 1998

This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk and uncertainty, asymmetric information and game theory. Traditional topics are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost, and examples are included throughout the text to reinforce the material presented.

Psychiatric Cultures Compared - Marijke Gijswijt-Hofstra 2005

The comparative global history of mental health care in the twentieth century remains relatively uncharted territory. Psychiatric Cultures Compared offers an overview of various national psychiatric cultures, comparing, for example, advances in Dutch psychiatry with developments abroad. Wide-ranging essays cover analyses of the field of psychiatric nursing, the changing use of psychotropic medicine, the emergence of in- and outpatient mental health sectors, the rise of the anti-psychiatry movement, and a

critical look at modern day deinstitutionalization.

An Introduction to Social Psychology - Miles Hewstone 2012-05-14

"The fifth edition of this highly successful text, An Introduction to Social Psychology has been fully revised and updated. Accessibility for students has been improved, including better illustrations, greater use of colour and a more approachable format, as well as a wealth of online resources. Combining its traditional academic rigour with a contemporary level of cohesion, accessibility, pedagogy and instructor support, the fifth edition of An Introduction to Social Psychology provides the definitive treatment of social psychology"--
The Globalization Backlash - Colin Crouch 2018-12-06

Globalization, heralded for decades as a harbinger of prosperity, faces a huge backlash. Derided by right-wing nationalists as a 'globalist' plot to undermine traditional communities, and by left-wing critics as the rule of rampaging corporations, it's become a political punching bag around the world. In this incisive book, leading commentator Colin Crouch defends globalization against its critics to the right and left. He argues that reversing the process would mean a poorer world riven by nationalistic and reactionary antagonisms. However, globalization will only be worth saving if we institute reforms to promote social solidarity and recover pride and confidence for the cities and regions that have lost out. Crouch shows that we can therefore only save globalization from itself if we transcend the nation state and subject global economic flows to democratically responsible transnational governance. Crouch provides a much-needed riposte to the delusions that risk plunging the world back into a zero-sum game of regressive economic nationalism, combining cool-headed analysis with a visionary call for a reformed and genuinely progressive globalization.

Perception - Nicola Bruno 2018-07-26

The way that we interact with the environment on a daily basis is inherently multisensory. Even a simple task such as judging the location of a light in a dark room depends not only on vision but also on proprioceptive cues about the position of our body in space. The way that we experience food can be influenced not just by taste and smell, but by visual and auditory cues. Perception: A multisensory perspective adopts a multisensory approach to understanding perception. Rather than discussing each sense separately, this book defines perception as intrinsically multisensory from the start and examines multisensory interactions as the key process behind how we perceive our own body, control its movements, and perceive and recognise objects, space, and time. But the book delves even deeper. It discusses multisensory processing in conditions such as synaesthesia. It addresses attention and the role of multisensory processing in learning. By focussing on these domains, the authors highlight and identify general principles in the field of perception study and introduce models, experimental methods and pathologies that will be of interest to all those studying within the field of perception. The authors also illustrate applications that will be of interest to professionals whose work takes multisensory processing into account. As an introduction to the topic of multisensory perception, Perception: A multisensory perspective will be essential reading for students, from advanced undergraduate level through to postgraduate level in psychology, philosophy, and neuroscience. Those studying physiotherapy and neurological rehabilitation, human-computer interface development, or the design of products or services will also find this book of interest.

Military Life in Italy - Edmondo De Amicis 1882

Theories of Developmental Psychology - Patricia H. Miller 2016-02-15

Always reflective of the latest research and thinking in the field, Patricia Miller's acclaimed text offers an ideal way to help students understand and distinguish the major theoretical schools of child development. This fully updated new edition includes a new focus on biological theories of development, and offers new instructor resource materials.

Memory - Alan Baddeley 2015-03-24

This best-selling textbook presents a comprehensive and accessible overview of the study of memory. Written by three of the world's leading researchers in the field, it contains everything the student needs to know about the scientific approach to memory and its applications. Each chapter of the book is written by one of the three authors, an approach which takes full advantage of their individual expertise and style,

creating a more personal and accessible text. This enhances students' enjoyment of the book, allowing them to share the authors' own fascination with human memory. The book also draws on a wealth of real-world examples throughout, showing students exactly how they can relate science to their everyday experiences of memory. Key features of this edition: Thoroughly revised throughout to include the latest research and updated coverage of key ideas and models A brand new chapter on Memory and the Brain, designed to give students a solid understanding of methods being used to study the relationship between memory and the brain, as well as the neurobiological basis of memory Additional pedagogical features to help students engage with the material, including many 'try this' demonstrations, points for discussion, and bullet-pointed chapter summaries The book is supported by a companion website featuring extensive online resources for students and lecturers.

Economic Sociology - Carlo Trigilia 2008-04-15

This book systematically reconstructs the origins and new advances in economic sociology. By presenting both classical and contemporary theory and research, the volume identifies and describes the continuity between past and present, and the move from economics to economic sociology. Most comprehensive and up-to-date overview available by an internationally renowned, award-winning economic sociologist Systematically reconstructs the origins and new advances in economic sociology Organizes the perspectives and methods of economic sociologists of the classical and contemporary eras, including coverage of modernization, globalization, and the welfare state Provides insights into the social consequences of capitalism in the past and present for students of economic sociology.

The Psychoanalytic Model of the Mind - Elizabeth L. Auchincloss 2015-04-28

Despite the widespread influence of psychoanalysis in the field of mental health, until now no single book has been published that explains the psychoanalytic model of the mind to the many students and practitioners who want to understand it. The Psychoanalytic Model of the Mind represents an important breakthrough: in simple language, it presents complicated ideas and concepts in an accessible manner, demystifies psychoanalysis, debunks some of the myths that have plagued it, and defuses the controversies that have too long attended it. The author effectively demonstrates that the psychoanalytic model of the mind is consistent with a brain-based approach. Even in patients whose mental illness has a predominantly biological basis, psychological factors contribute to the onset, expression, and course of the illness. For this reason, treatments that focus exclusively on symptoms are not effective in sustaining change. The

psychoanalytic model provides clinicians with the framework to understand each patient as a unique psychological being. The book is rich in descriptive detail yet pragmatic in its approach, offering many features and benefits: In addition to providing the theoretical scaffolding for psychodynamic psychotherapy, the book emphasizes the critical importance of forging a strong treatment alliance, which requires understanding the transference and countertransference reactions that either disrupt or strengthen the clinician-patient bond. The book is respectful of Freud without being reverential; it considers his contribution as founder of psychoanalysis in the context of the historical and conceptual evolution of the field. The final section is devoted to learning to use the psychoanalytic model and exploring how it can be integrated with existing models of the mind. In addition to being a valuable reference for mental health clinicians, the text can serve as a resource for undergraduate and graduate students of philosophy, neuroscience, psychology, literature, and all academic disciplines outside of the mental health professions who may want to learn more about what psychoanalysts have to say about the mind. Important features include an extensive glossary of terms, a series of illustrative tables, and appendixes addressing libido theory and defenses. Drawing upon a broad range of sources to make her case, the author persuasively argues that the basic tenets of the psychoanalytic model of the mind are supported by empirical evidence as well as clinical efficacy. The Psychoanalytic Model of the Mind is a fascinating exploration of this complex model of mental functioning, and both clinicians and students of the mind will find it comprehensive and riveting.

Medium Is the Massage - Marshall McLuhan 1989

Cultural Anthropology - Richard H. Robbins 2020-07-16

Now with SAGE Publishing! In a first-of-its-kind format, Cultural Anthropology: A Problem-Based Approach is organized by problems and questions rather than topics, creating a natural discussion of traditional anthropological concerns such as kinship, caste, gender roles, and religion. This brief text promotes critical thinking through meaningful exercises, case studies, and simulations. Students will learn how to analyze their own culture and gain the tools to understand the cultures of other societies. The Eighth Edition has been thoroughly updated and reorganized to emphasize contemporary issues around social and economic inequality, gender identity, and more. FREE DIGITAL TOOLS INCLUDED WITH THIS TEXT SAGE Edge gives instructors the edge they need to succeed with an array of teaching tools in one easy-to-navigate website. Learn more: edge.sagepub.com/robbins8e
