Advances in Neuroergonomics and Cognitive Engineering -

Hasan Ayaz 2020-06-27

This book offers broad overview of the field of cognitive engineering and neuroergonomics, covering emerging practices and future trends toward the harmonious integration of human operators

and computer systems. It presents novel theoretical findings on mental workload and stress, activity theory, human reliability, error and risk, and a wealth of cutting-edge applications, such as strategies to make assistive technologies more user-oriented. Further, the book describes key advances in our understanding of cognitive processes, including mechanisms of perception, memory, reasoning, and motor response, with a particular focus on their role in interactions between humans and other elements of computer-based systems. Gathering the proceedings of the AHFE 2020 Virtual Conferences on Neuroergonomics and Cognitive Engineering, and Industrial Cognitive Ergonomics and Engineering Psychology, held on 16–20 July 2020, this book provides extensive and timely information for human-computer interaction researchers, human factors engineers and interaction

designers, as well as decision-makers.

Petrarch and Boccaccio - Igor Candido 2018-02-19

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio.

Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution.

Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio

between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance

Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come.

Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed

unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

Ethno-symbolism and Nationalism - Anthony D. Smith 2009-02-02

Anthony D. Smith is Emeritus Professor of Nationalism and Ethnicity at the London School of Economics, and is considered one of the founders of the interdisciplinary field of nationalism studies. Anthony Smith has developed an approach to the study of nations and nationalism called ethno-symbolism, which is concerned with the nature of ethnic groups and nations, and the need to consider their symbolic dimensions. This text provides a concise statement of an ethno-symbolic approach to the study of nations and nationalism and at the same time, embodies a general statement of Anthony Smith's contribution to this approach and its application to the central issues of nations and nationalism. The text: sets out the theoretical background of the emergence of ethno-symbolism in a sustained and systematic argument explains its analysis of the formation of nations, their persistence and

change and the role of nationalism demonstrates that an ethno-symbolic approach provides an important supplement and corrective to past and present intellectual orthodoxies in the field and addresses the main theoretical criticisms levelled at an ethno-symbolic approach. Drawing together and developing earlier brief resumes of Anthony Smith's approach, this book represents a summary of the theoretical aspects of his work in the field since 1986. It will be useful to students and to all those who are interested in the issues raised by a study of ethnicity, nations and nationalism.

The Lost Constellations - John C. Barentine 2015-10-23
Casual stargazers are familiar with many classical figures and asterisms composed of bright stars (e.g., Orion and the

Plough), but this book reveals not just the constellations of today but those of yesteryear. The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived. The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted, explaining how the constellations described in the book became permanently "extinct." Dr. Barentine addresses why some figures were tried and discarded, and also directs observers to how those figures can still be picked out on a clear night if one knows where to look. These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing

that merges history with the accessibility and immediacy of the night sky.

Equity, Growth, and Community - Chris Benner
2015-10-09

In the last several years, much has been written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to overcome political polarization and to address the challenges of economic restructuring and social divides. "As America bolts toward a more multiracial future in the face of skyrocketing inequality, local leaders are desperately seeking

strategies to foster more inclusive growth. Chris Benner and Manuel Pastor's research uncovers a critical ingredient of success: diverse regional leaders coming together to build a foundation of shared knowledge and advance positive change." -- ANGELA GLOVER BLACKWELL, Founder and CEO, PolicyLink

CHRIS BENNER is the Dorothy E. Everett Chair in Global Information and Social Entrepreneurship, Director of the Everett Program for Digital Tools for Social Innovation, and Professor of Environmental Studies and Sociology at the University of California, Santa Cruz. Multisystemic Resilience -

Michael Ungar 2021
"Across diverse disciplines, the term resilience is appearing more and more often. However, while each discipline has developed theory and

models to explain the resilience of the systems they study (e.g., a natural environment, a community post-disaster, the human mind, a computer network, or the economy), there is a lack of over-arching theory that describes: 1) whether the principles that underpin the resilience of one system are similar or different from the principles that govern resilience of other systems; 2) whether the resilience of one system affects the resilience of other co-occurring systems; and 3) whether a better understanding of resilience can inform the design of interventions, programs and policies that address "wicked" problems that are too complex to solve by changing one system at a time? In other words (and as only one example among many) are there similarities between how a person builds and sustains psychological resilience and how a forest, community or the business where he or she works remains successful and sustainable during periods of extreme adversity? Does

psychological resilience in a human being influence the resilience of the forests (through a change in attitude towards conservation), community (through a healthy tolerance for differences) and businesses (by helping a workforce perform better) with which a person interacts? And finally, does this understanding of resilience help build better social and physical ecologies that support individual mental health, a sustainable environment and a successful economy at the same time?"--

the terrible onslaught, buying time for the Greeks to rally their forces. Born into a cult of spiritual courage, physical endurance, and unmatched battle skill, the Spartans would be remembered for the greatest military stand in history—one that would not end until the rocks were awash with blood, leaving only one gravely injured Spartan squire to tell the tale. . . .

Love, Theodosia - Lori Anne Goldstein 2021-11-02

A Romeo & Juliet tale for Hamilton! fans. In post-American Revolution New York City, Theodosia Burr, a scholar with the skills of a socialite, is all about charming the right people on behalf of her father—Senator Aaron Burr, who is determined to win the office of president in the pivotal election of 1800. Meanwhile, Philip Hamilton, the rakish son of Alexander Hamilton, is all about being charming on behalf of his libido. When the two first meet, it seems the ongoing feud between their politically opposed fathers may be

hereditary. But soon, Theodosia and Philip must choose between love and family, desire and loyalty, and preserving the legacy their flawed fathers fought for or creating their own. Love, Theodosia is a smart, funny, swoony take on a fiercely intelligent woman with feminist ideas ahead of her time who has long-deserved center stage. A refreshing spin on the Hamiltonian era and the characters we have grown to know and love. It's also a heartbreaking romance of two star-crossed lovers, an achingly bittersweet "what if." Despite their fathers' bitter rivalry, Theodosia and Philip are drawn to each other and, in what unrolls like a Jane Austen novel of manners, we find ourselves entangled in the world of Hamilton and Burr once again as these heirs of famous enemies are driven together despite every reason not to be.

Divided Souls - Elisheva Carlebach
2008-10-01

This pioneering book reevaluates the place of converts from Judaism in the narrative of Jewish history. Long considered beyond the

pale of Jewish historiography, converts played a central role in shaping both noxious and positive images of Jews and Judaism for Christian readers. Focusing on German Jews who converted to Christianity in the sixteenth through mid-eighteenth centuries, Elisheva Carlebach explores an extensive and previously unexamined trove of their memoirs and other writings. These fascinating original sources illuminate the Jewish communities that the converts left, the Christian society they entered, and the unabating tensions between the two worlds in early modern German history. The book begins with the medieval images of converts from Judaism and traces the hurdles to social acceptance that they encountered in Germany through early modern times. Carlebach examines the converts' complicated search for community, a quest that was to characterize much of Jewish modernity, and she concludes with a consideration of the converts' painful

legacies to the Jewish experience in German lands. "Carlebach's reading of autobiographical texts by converts from Judaism is careful, intelligent, and skeptical--a model of how to treat spiritual memoirs."--Todd M. Endelman, University of Michigan "This superb book highlights the ambiguous identities of these boundary crossers and their impact on both German and Jewish self-definitions."--Paula E. Hyman, Yale University Elisheva Carlebach is professor of history at Queens College and the Graduate Center, City University of New York. She is the author of The Pursuit of Heresy: Rabbi Moses Hagiz and the Sabbatian Controversies, winner of the National Jewish Book Award for Jewish History, and coeditor of Jewish History and Jewish Memory. /DIV

Virtual Art - Oliver Grau
2004-09-17

An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch

used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima Porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies,

Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

A Boy at War - Harry Mazer
2012-06-26

They rowed hard, away from the battleships and the bombs. Water sprayed over them. The rowboat pitched one way and then the other. Then, before his eyes, the Arizona lifted up out of the water. That enormous battleship bounced up in the air like a rubber ball and split apart. Fire burst out of the ship. A geyser of water shot into the air and came crashing down. Adam was almost

thrown out of the rowboat. He clung to the seat as it swung around. He saw blue skies and the glittering city. The boat swung back again, and he saw black clouds, and the Arizona, his father's ship, sinking beneath the water. -- from A Boy at War "He kept looking up, afraid the planes would come back. The sky was obscured by black smoke....It was all unreal: the battleships half sunk, the bullet holes in the boat, Davi and Martin in the water." December 7, 1941: On a quiet Sunday morning, while Adam and his friends are fishing near Honolulu, a surprise attack by Japanese bombers destroys the fleet at Pearl Harbor. Even as Adam struggles to survive the sudden chaos all around him, and as his friends endure the brunt of the attack, a greater concern hangs over his head: Adam's father, a navy lieutenant, was stationed on the USS Arizona when the bombs fell. During the subsequent days Adam -- not yet a man, but no longer a boy -- is caught up in the war as he desperately tries to make

sense of what happened to his friends and to find news of his father. Harry Mazer, whose autobiographical novel, *The Last Mission*, brought the European side of World War II to vivid life, now turns to the Pacific theater and how the impact of war can alter young lives forever.

Body Parts and Bodies Whole -
Katharina Rebay-Salisbury
2010

This volume grew out of an interdisciplinary discussion held in the context of the Leverhulme-funded project 'Changing Beliefs in the Human Body', through which the image of the body in pieces soon emerged as a potent site of attitudes about the body and associated practices in many periods. Archaeologists routinely encounter parts of human and animal bodies in their excavations. Such fragmentary evidence has often been created through accidental damage and the passage of time - nevertheless, it can also signify a deliberate and meaningful act of fragmentation. As a fragment, a part may acquire a distinct meaning through its enchainment to the whole or alternatively it may be used in a more straightforward manner to represent the whole or even

act as stand-in for other variables. This collection of papers puts bodily fragmentation into a long-term historical perspective. The temporal spread of the papers collected here indicates both the consistent importance and the varied perception of body parts in the archaeological record of Europe and the Near East. By bringing case studies together from a range of locations and time periods, each chapter brings a different insight to the role of body parts and body wholes and explores the status of the body in different cultural contexts. Many of the papers deal directly with the physical remains of the dead body, but the range of practices and representations covered in this volume confirm the sheer variability of treatments of the body throughout human history. Every one of the contributions shows how looking at how the human body is divided into pieces or parts can give us deeper insights into the beliefs of the particular society which produced these

practices and representations.

Authorities in the Middle Ages -

Sini Kangas 2013-04-30

Medievalists reading and writing about and around authority-related themes lack clear definitions of its actual meanings in the medieval context. *Authorities in the Middle Ages* offers answers to this thorny issue through specialized investigations. This book considers the concept of authority and explores the various practices of creating

authority in medieval society.

In their studies sixteen scholars investigate the definition, formation, establishment, maintenance, and collapse of what we understand in terms of medieval struggles for authority, influence and power. The interdisciplinary nature of this volume resonates with the multi-faceted field of medieval culture, its social structures, and forms of communication.

The fields of expertise include history, legal studies, theology, philosophy, politics, literature and art history. The scope of inquiry extends from late antiquity to the mid-fifteenth century, from the Church Fathers debating with pagans to the rapacious ghosts ruining the life of the living in the Sagas. There is a special emphasis on such exciting but understudied areas as the Balkans, Iceland and the eastern fringes of Scandinavia.
