A Little History of the World - E. H. Gombrich 2014-10-01

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Wonderful Blood - Caroline Walker Bynum 2007-11-05

Bynum argues that Christ's blood as both object and symbol was central to late medieval art, literature, and religious life. As cult object, blood provided a focus of theological debate about the nature of matter, body, and God and an occasion for Jewish persecution; as motif, blood became a central symbol in popular devotion.

Forgery and Memory at the End of the First Millennium - Levi Roach 2021-02-09

An in-depth exploration of documentary forgery at the turn of the first millennium Forgery and Memory at the End of the First Millennium takes a fresh look at documentary forgery and historical memory in the Middle Ages. In the tenth and eleventh centuries, religious houses across Europe began falsifying texts to improve local documentary records on an unprecedented scale. As Levi Roach illustrates, the resulting wave of forgery signaled major shifts in society and political culture, shifts which would lay the foundations for the European ancien régime. Spanning documentary traditions across France, England, Germany and northern Italy, Roach examines five sets of falsified texts to demonstrate how forged records produced in this period gave voice to new collective identities within and beyond the Church. Above all, he indicates how this fad for falsification points to new attitudes toward past and present—a developing fascination with the signs of antiquity. These conclusions revise traditional master narratives about the development of

antiquarianism in the modern era, showing that medieval forgers were every bit as sophisticated as their Renaissance successors. Medieval forgers were simply interested in different subjects—the history of the Church and their local realms, rather than the literary world of classical antiquity. A comparative history of falsified records at a crucial turning point in the Middle Ages, Forgery and Memory at the End of the First Millennium offers valuable insights into how institutions and individuals rewrote and reimagined the past.

The Brain That Changes Itself - Norman Doidge 2007-03-15

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

"Manchester provides easy access to a fascinating age when our

modern mentality was just being born." --Chicago Tribune
Illuminating Women in the Medieval World - Christine Sciacca
2017-06-06

When one thinks of women in the Middle Ages, the images that often come to mind are those of damsels in distress, mystics in convents, female laborers in the field, and even women of ill repute. In reality, however, medieval conceptions of womanhood were multifaceted, and women's roles were varied and nuanced. Female stereotypes existed in the medieval world, but so too did women of power and influence. The pages of illuminated manuscripts reveal to us the many facets of medieval womanhood and slices of medieval life—from preoccupations with biblical heroines and saints to courtship, childbirth, and motherhood. While men dominated artistic production, this volume demonstrates the ways in which female artists, authors, and patrons were instrumental in the creation of illuminated manuscripts. Featuring over one hundred illuminations depicting medieval women from England to Ethiopia, this book provides a lively and accessible introduction to the lives of women in the medieval world.

The Dark Queens - Shelley Puhak 2022-02-22
"A well-researched and well-told epic history. The Dark Queens brings these courageous, flawed, and ruthless rulers and their distant times back to life."--Margot Lee Shetterly, New York Times-bestselling author of *Hidden Figures*
The remarkable, little-known story of two trailblazing women in the Early Middle Ages who wielded immense power, only to be vilified for daring to rule. Brunhild was a foreign princess, raised to be married off for the sake of alliance-building. Her sister-in-law Fredegund started out as a lowly palace slave. And yet—in sixth-century Merovingian France, where women were excluded from noble succession and royal politics was a blood sport—these two iron-willed strategists reigned over vast realms, changing the face of Europe. The two queens commanded armies and negotiated with kings and popes. They formed coalitions and broke them, mothered children and lost them. They fought a decades-long civil war—against each other. With ingenuity and skill, they battled to stay alive in the game of statecraft, and in the process laid the foundations of what would one day be Charlemagne's empire. Yet after the queens' deaths—one gentle, the other horrific—their stories were rewritten, their names consigned to slander and legend. In *The Dark Queens*, award-winning writer Shelley Puhak sets the record straight. She resurrects two very real women in all their complexity, painting a richly detailed portrait of an unfamiliar time and striking at the roots of some of our culture's stubbornest myths about female power. *The Dark Queens* offers proof that the relationships between women can transform the world.

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history

and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

How the Irish Saved Civilization - Thomas Cahill 2010-04-28
The perfect St. Patrick's Day gift, and a book in the best tradition of popular history -- the untold story of Ireland's role in maintaining Western culture while the Dark Ages settled on Europe. Every year millions of Americans celebrate St. Patrick's Day, but they may not be aware of how great an influence St. Patrick was on the subsequent history of civilization. Not only did he bring Christianity to Ireland, he instilled a sense of literacy and learning that would create the conditions that allowed Ireland to become "the isle of saints and scholars" -- and thus preserve Western culture while Europe was being overrun by barbarians. In this entertaining and compelling narrative, Thomas Cahill tells the story of how Europe evolved from the classical age of Rome to the medieval era. Without Ireland, the transition could not have taken place. Not only did Irish monks and scribes maintain the very record of Western civilization -- copying manuscripts of Greek and Latin writers, both pagan and Christian, while libraries and learning on the continent were forever lost -- they brought their uniquely Irish world-view to the task. As Cahill delightfully illustrates, so much of the liveliness we associate with medieval culture has its roots in Ireland. When the seeds

of culture were replanted on the European continent, it was from Ireland that they were germinated. In the tradition of Barbara Tuchman's *A Distant Mirror, How The Irish Saved Civilization* reconstructs an era that few know about but which is central to understanding our past and our cultural heritage. But it conveys its knowledge with a winking wit that aptly captures the sensibility of the unsung Irish who relaunched civilization. **BONUS MATERIAL:** This ebook edition includes an excerpt from Thomas Cahill's *Heretics and Heroes*.

A History of Medieval Europe - R.H.C. Davis 2013-08-16

R.C. Davis provided the classic account of the European medieval world; equipping generations of undergraduate and 'A' level students with sufficient grasp of the period to debate diverse historical perspectives and reputations. His book has been important grounding for both modernists required to take a course in medieval history, and those who seek to specialise in the medieval period. In updating this classic work to a third edition, the additional author now enables students to see history in action; the diverse viewpoints and important research that has been undertaken since Davis' second edition, and progressed historical understanding. Each of Davis original chapters now concludes with a 'new directions and developments' section by Professor RI Moore, Emeritus of Newcastle University. A key work updated in a method that both enhances subject understanding and sets important research in its wider context. A vital resource, now up-to-date for generations of historians to come.

Toward a Global Middle Ages - Bryan C. Keene 2019-09-03

This important and overdue book examines illuminated manuscripts and other book arts of the Global Middle Ages. Illuminated manuscripts and illustrated or decorated books—like today's museums—preserve a rich array of information about how premodern peoples conceived of and perceived the world, its many cultures, and everyone's place in it. Often a Eurocentric field of study, manuscripts are prisms through which we can glimpse the interconnected global history of humanity. *Toward a Global Middle Ages* is the first publication to examine decorated books produced across the globe during the period traditionally known as medieval. Through essays and case studies, the volume's multidisciplinary contributors expand the historiography, chronology, and geography of manuscript studies to embrace a diversity of objects, individuals, narratives, and materials from Africa, Asia, Australasia, and the Americas—an approach that both engages with and contributes to the emerging field of scholarly inquiry known as the Global Middle Ages. Featuring more than 160 color illustrations, this wide-ranging and provocative collection is intended for all who are interested in engaging

in a dialogue about how books and other textual objects contributed to world-making strategies from about 400 to 1600.

Medieval Europe - Chris Wickham 2016-10-15

A spirited history of the changes that transformed Europe during the 1,000-year span of the Middle Ages: "A dazzling race through a complex millennium."—Publishers Weekly The millennium between the breakup of the western Roman Empire and the Reformation was a long and hugely transformative period—one not easily chronicled within the scope of a few hundred pages. Yet distinguished historian Chris Wickham has taken up the challenge in this landmark book, and he succeeds in producing the most riveting account of medieval Europe in a generation. Tracking the entire sweep of the Middle Ages across Europe, Wickham focuses on important changes century by century, including such pivotal crises and moments as the fall of the western Roman Empire, Charlemagne's reforms, the feudal revolution, the challenge of heresy, the destruction of the Byzantine Empire, the rebuilding of late medieval states, and the appalling devastation of the Black Death. He provides illuminating vignettes that underscore how shifting social, economic, and political circumstances affected individual lives and international events—and offers both a new conception of Europe's medieval period and a provocative revision of exactly how and why the Middle Ages matter. "Far-ranging, fluent, and thoughtful—of considerable interest to students of history writ large, and not just of Europe."—Kirkus Reviews, (starred review) Includes maps and illustrations

Infrastructure Finance in Europe - Youssef Cassis 2016-01-14

Funding infrastructure has always been a challenging issue in any country and at any time, yet the topic is still largely unexplored. The social returns of investment in water, roads, railways, or more recently telegraph or communication satellites are often apparent in the long run, but this distant horizon poses special problems to governments and investors. This volume provides a broad overview of the main financing solutions implemented in Europe to support infrastructures from the fall of the Roman Empire up to the end of the 20th century. It explores the diverse historical paths pursued in order to solve the problem of infrastructure finance in various European countries, and draws upon the findings of an international and interdisciplinary research project. It brings together case studies by economic historians, economists, and engineers, and the clear taxonomy guides the reader through the financing solutions that have been developed to fund infrastructure over almost three thousand years. The volume is organized into four parts; after an introductory chapter by the editors, Part One offers 'horizontal' contributions that cover the history of European infrastructure finance. Parts Two, Three, and Four each focus on a single sector, namely water, transport, and telecommunications. The findings show how history can inform thinking on contemporary infrastructure problems.
